SUMMARY SECTION

INVESTMENT OBJECTIVE

The investment objective of the Campbell Systematic Macro Fund (the “Fund”) is to seek capital appreciation over the medium to long-term.

EXPENSES AND FEES

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund (the “Shares”). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below. You may qualify for sales charge discounts if you invest at least \$25,000 in Class A Shares of the Fund. More information about these discounts is available from your financial professional, in the section of this Prospectus entitled “Shareholder Information – Sales Charges” and in the section of the Fund’s Statement of Additional Information (“SAI”) entitled “Purchase and Redemption Information – Reducing or Eliminating the Front End Sales Charge.” **Financial Intermediaries may impose different sales charge waivers for Class A Shares, and these variations are described in the section of this Prospectus entitled “Shareholder – Information – Sales Charges”.**

	<u>CLASS A</u>	<u>CLASS I</u>	<u>CLASS C</u>
SHAREHOLDER FEES (fees paid directly from your investment)			
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	3.50%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price) ⁽¹⁾	None	None	1.00%
ANNUAL FUND OPERATING EXPENSES (expenses that you pay each year as a percentage of the value of your investment)			
Management Fees	1.64 %	1.64 %	1.64 %
Distribution and/or Service (12b-1) Fees ⁽²⁾	0.25 %	None	1.00 %
Other Expenses ⁽³⁾	0.21 %	0.21 %	0.21 %
Total Annual Fund Operating Expenses	2.10 %	1.85 %	2.85 %
Fee Waivers and/or Expense Reimbursements ⁽⁴⁾	-0.09%	-0.09%	-0.09%
Total Annual Fund Operating Expenses After Fee Waiver	2.01 %	1.76 %	2.76 %

⁽¹⁾ A contingent deferred sales charge (“CDSC”) of 1.00% is assessed on redemptions of Class C shares made within twelve months after a purchase of Class C Shares.

⁽²⁾ The Fund has adopted a distribution plan for Class A Shares and Class C Shares pursuant to Rule 12b-1 (“Rule 12b-1 Plan”) under the Investment Company Act of 1940, as amended (the “1940 Act”) that permits payments of up to 0.25% as a percentage of average daily net assets of the Fund’s Class A Shares and payments of up to 1.00% as a percentage of average daily net assets of the Fund’s Class C Shares.

⁽³⁾ “Other Expenses” includes Acquired Fund Fees and Expenses (“AFFE”), which are indirect fees and expenses that the Fund incurs from investing in the shares of other mutual funds, including money market funds and exchange traded funds. Please note that the amount of Total Annual Fund Operating Expenses shown in the above table will differ from the “Financial Highlights” section of the Prospectus, which reflects the operating expenses of the Fund and does not include indirect expenses such as AFFE.

⁽⁴⁾ Campbell & Company Investment Adviser LLC (“Campbell” or the “Adviser”) has contractually agreed to waive its advisory fee and/or reimburse expenses in order to limit Total Annual Fund Operating Expenses (excluding certain items discussed below) to 2.00%, 1.75%, and 2.75% of the Fund’s average daily net assets for Class A Shares, Class I Shares, and Class C Shares, respectively. In determining the Adviser’s obligation to waive advisory fees and/or reimburse expenses, the following expenses are not taken into account and could cause net Total Annual Fund Operating Expenses to exceed 2.00%, 1.75%, and 2.75%, as applicable: acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes. This contractual limitation is in effect until December 31, 2026 and may not be terminated without the approval of the Board of Directors of The RBB Fund, Inc. If at any time the Fund’s Total Annual Fund Operating Expenses (not including acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes) for a year are less than 2.00%, 1.75%, and 2.75%, as applicable, the Adviser may recoup from the Fund any waived amount or other payments remitted by the Adviser within three years from

the date on which such waiver or reimbursement was made, provided such reimbursement does not cause the Fund to exceed expense limitations that were in effect at the time of the waiver or reimbursement and the expense limitations that are current in effect.

EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in Class A Shares, Class I Shares or Class C Shares in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same, and that the expense limitation applies only for the first year. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<u>1 YEAR</u>	<u>3 YEARS</u>	<u>5 YEARS</u>	<u>10 YEARS</u>
Class A Shares	\$547	\$976	\$1,431	\$2,689
Class I Shares	\$179	\$573	\$992	\$2,162
Class C Shares (with redemption at end of period)	\$379	\$856	\$1,459	\$3,090
Class C Shares (without redemption at end of period)	\$279	\$856	\$1,459	\$3,090

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the fiscal year ended August 31, 2025, the portfolio turnover rate of the Fund was 0% of the average value of its portfolio. In accordance with industry practice, derivative instruments and instruments with a maturity of one year or less at the time of acquisition are excluded from the calculation of the portfolio turnover rate, which leads to the 0% portfolio turnover rate reported above. If those instruments were included in the calculation, the Fund would have a higher portfolio turnover rate.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by (i) investing its assets pursuant to the Campbell Systematic Macro Program (as described below), (ii) allocating up to 25% of its total assets in its wholly-owned subsidiary, Campbell Systematic Macro Offshore Limited (the “Subsidiary”), which is organized under the acts of the Cayman Islands and employs the Adviser’s Campbell Systematic Macro Program, and (iii) allocating the remainder of its assets directly in a portfolio of investment grade securities (including government securities) for cash management purposes. Securities rated in the four highest categories by the ratings agencies are considered investment grade.

The Fund invests pursuant to the Adviser’s Campbell Systematic Macro Program, which uses quantitative modeling to develop and maintain systematic trading strategies driven by scientific analysis of financial data across global financial and commodity markets. The Campbell Systematic Macro Program seeks to systematically identify price trends and to develop macro and fundamental themes that exploit asset mispricing.

Campbell’s Systematic Macro Program, as currently implemented by the Fund, combines Momentum with Quant Macro and Short Term strategies to target maximized diversification. Momentum strategies are designed to capitalize on the tendency for longer-term performance of markets to continue due to behavioral biases, compensation for risk exposures, or other phenomena. Quant Macro strategies are designed to capitalize on asset mispricing caused by fundamental economic considerations or macroeconomic linkages between markets. Short Term strategies, including momentum and mean reversion, are designed to capitalize on temporary market dislocations caused by liquidity demands, trader behaviors, or other phenomena. As of the date of this prospectus, the allocation among these strategies is as follows: Momentum – 40%; Quant Macro – 35%, and Short Term – 25%. The Adviser reserves the right to vary these allocations over time.

The Fund implements these strategies by combining over 100 different systematic models (also referred to as “signals” and/or “alpha sources”). A systematic model is a clearly defined, rules-based approach that uses computer code and data to generate trading signals. A systematic process eliminates emotion, “key person” risk, and provides an ability to participate in trends during periods of extended momentum without any directional bias. Key person risk is the risk that results when a fund’s investment program is highly dependent on the investment skill and dedication of

a small number of “key” persons at an adviser, which can result in decreased investment results if these “key” persons become unable to apply their full attention to the management of a fund’s investments for health or other reasons. In addition, a diversity of investment style and the ability to invest long and short across global asset classes and markets enables investment opportunities in a variety of economic environments. The Fund is generally intended to have a low correlation to the equity, bond and credit markets. There is no assurance, however, that the Fund will achieve its investment objective.

The Fund intends to trade in a broad range of instruments (also referred to in the futures trading industry as “markets”), including but not limited to, futures (including commodity futures, index futures, equity futures, bond futures and interest rate futures), currency forwards, options and swaps (including commodity swaps, swaps on commodity futures, equity swaps, swaps on index futures, total return swaps and interest rate swaps), either by investing directly in the instruments or, indirectly, by investing in the Subsidiary which invests in the instruments. From time to time, the Fund can have significant exposure to non-U.S. dollar denominated currencies, including emerging markets currencies. The instruments (or markets) currently traded by the Fund include over 100 global futures and forwards markets. The Fund may be long or short any of these markets at any given time. The Adviser reserves the right to vary the markets traded over time.

The Adviser will attempt to mitigate risk through diversification of holdings and through monitoring of the portfolio, the Fund’s counterparties, and other risk measures. Individual market positions are constrained to ensure that no one market or asset class represents an outsized portion of the Fund’s portfolio risk. The Adviser evaluates changes in signals daily, and execution is controlled by its intraday risk management and execution platform. The Fund may utilize proprietary or third-party trading algorithms in order to minimize market impact and reduce trading costs.

The Fund is “non-diversified” for purposes of the 1940 Act which means that the Fund may invest in fewer securities at any one time than a diversified fund. The Fund may not invest more than 15% of its net assets in illiquid investments.

Investments in the Subsidiary, which has the same investment objective as the Fund, are intended to provide the Fund with indirect exposure to futures contracts and commodities in a manner consistent with the limitations and requirements of the Internal Revenue Code of 1986, as amended (the “Code”) that apply to the Fund, which limit the amount of income the Fund may receive from certain sources. Applicable federal tax requirements generally limit the degree to which the Fund may invest in the Subsidiary to an amount not exceeding 25% of its total assets. To the extent they are applicable to the investment activities of the Subsidiary, the Subsidiary will be subject to the same investment restrictions and limitations, and follow the same compliance policies and procedures, as the Fund. The Fund complies with Section 8 and Section 18 of the 1940 Act, governing investment policies and capital structure and leverage, respectively, on an aggregate basis with the Subsidiary. The Subsidiary also complies with Section 17 of the 1940 Act relating to affiliated transactions and custody.

Principal Investment Risks

Risk is inherent in all investing. The value of your investment in the Fund (and, indirectly, in the Subsidiary), as well as the amount of return you receive on your investment, may fluctuate significantly from day to day and over time. You may lose part or all of your investment in the Fund or your investment may not perform as well as other similar investments. The Fund’s principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

- **Commodities Risk:** Exposure to the commodities markets (including financial futures markets) may subject the Fund through its investment in the Subsidiary to greater volatility than investments in traditional securities. Prices of commodities and related contracts may fluctuate significantly over short periods for a variety of reasons, including changes in interest rates or factors affecting a particular industry or commodity, such as weather, disease (including pandemics), tariffs, embargoes or other trade barriers, acts of war or terrorism, or political and regulatory developments.
- **Counterparty Risk:** The derivative contracts entered into by the Fund or its Subsidiary may be privately negotiated in the over-the-counter market. These contracts also involve exposure to credit risk, since contract performance depends in part on the financial condition of the counterparty. The participants in the over-the-counter market are typically not subject to credit evaluations and regulatory oversight as are members of “exchange based” markets. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not

bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of the Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund.

- **Credit Risk:** Credit risk refers to the possibility that the issuer of the security or a counterparty in respect of a derivative instrument will not be able to satisfy its payment obligations to the Fund when due. This may impair the Fund's liquidity or cause a deterioration in the Fund's net asset value ("NAV"). In addition, the Fund may incur expenses in an effort to protect the Fund's interests or enforce its rights against an issuer, guarantor or counterparty or may be hindered or delayed in exercising these rights. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer. Securities rated in the four highest categories by the rating agencies are considered investment grade, but they may also have some speculative characteristics. Investment grade ratings do not guarantee that securities will not lose value or default. In addition, the credit quality of securities may be lowered if an issuer's financial condition changes.
- **Currency Risk:** The Fund's exposure to foreign currencies subjects the Fund to the risk that those currencies will decline in value relative to the U.S. Dollar, or, in the case of short positions, that the U.S. Dollar will decline in value relative to the currency that the Fund is short. Currency rates in foreign countries may fluctuate significantly over short periods of time for any number of reasons, including changes in interest rates, rates of inflation, governmental surpluses or deficits, intervention (or the failure to intervene) by U.S. or foreign governments, actions of central banks or supranational entities and the imposition of currency controls or other political developments in the U.S. or abroad.
- **Cyber Security Risk:** Cyber security risk is the risk of an unauthorized breach and access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the Adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The Fund and its Adviser have limited ability to prevent or mitigate cyber security incidents affecting third-party service providers, and such third-party service providers may have limited indemnification obligations to the Fund or the Adviser. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact and cause financial losses to the Fund or its shareholders. Issuers of securities in which the Fund invests are also subject to cyber security risks, and the value of these securities could decline if the issuers experience cyber-attacks or other cyber-failures.
- **Derivatives Risk:** Derivatives include instruments and contracts that are based on, and are valued in relation to, one or more underlying securities, financial benchmarks or indices, such as futures, options, swap agreements and forward contracts. Derivatives typically have economic leverage inherent in their terms. Such leverage will magnify any losses. See "Leverage/Volatility Risk" below. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments. The primary types of derivatives in which the Fund or its Subsidiary invest in are swap agreements, futures contracts and forward contracts. Futures contracts, forward contracts and swap agreements can be highly volatile, illiquid and difficult to value, and changes in the value of such instruments held directly or indirectly by the Fund may not correlate with the underlying instrument or reference assets, or the Fund's other investments. Although the value of futures contracts, forward contracts and swap agreements depends largely upon price movements in the underlying instrument or reference asset, there are additional risks associated with futures contracts, forward contracts and swap agreements that are possibly greater than the risks associated with investing directly in the underlying instruments or reference assets, including illiquidity risk, leveraging risk and counterparty credit risk. A small position in futures contracts, forward contracts or swap agreements could have a potentially large impact on the Fund's performance. Trading restrictions or limitations may be imposed by an exchange, and government regulations may restrict trading in swap agreements, futures contracts and options and forward contracts. The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues,

settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

- **Emerging Market Risk:** The Fund intends to have exposure to emerging markets due to the Fund's investments in certain stock index futures and foreign exchange instruments. Emerging markets are riskier than more developed markets because they tend to develop unevenly and may never fully develop. Investments in emerging markets may be considered speculative. Emerging markets are more likely to experience hyperinflation and currency devaluations, which adversely affect returns to U.S. investors. In addition, many emerging financial markets have far lower trading volumes and less liquidity than developed markets; are subject to greater social, economic and political instability; have less governmental supervision and regulation of securities markets; and have weaker auditing and financial reporting standards. The information available about an emerging market issuer may be less reliable than for comparable issuers in more developed capital markets. Further, investments in certain emerging markets are subject to an elevated risk of loss resulting from market manipulation and the imposition of exchange controls (including repatriation restrictions). The legal rights and remedies available for investors in emerging markets may be more limited than the rights and remedies available in the U.S., and the ability of U.S. authorities (*e.g.*, SEC and the U.S. Department of Justice) to bring actions against bad actors in emerging markets may be limited.
- **Equity Securities Risk:** The Fund may invest in, or have exposure to, equity securities. Equity securities tend to be more volatile than other investment choices, such as debt and money market instruments. The value of your investment may decrease in response to overall stock market movements or the value of individual securities.
- **Fixed-Income Risk:** Fixed income securities, such as U.S. Treasuries, or derivatives based on fixed income securities, are subject to credit risk and interest rate risk. Credit risk, as described more fully herein, refers to the possibility that the issuer of a debt security will be unable to make interest payments or repay principal when it becomes due. Interest rate risk refers to fluctuations in the value of a debt security resulting from changes in the general level of interest rates. Prices of fixed income securities tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect fixed income security prices and, accordingly, the Fund's returns and share price. In addition, the Fund may be subject to "call" risk, which is the risk that during a period of falling interest rates the issuer may redeem a security by repaying it early (which may reduce the Fund's income if the proceeds are reinvested at lower interest rates), and "extension" risk, which occurs during a rising interest rate environment because certain obligations will be paid off by an issuer more slowly than anticipated (causing the value of those securities held by the Fund to fall).
- **Foreign Market Risk:** As a general rule, there is less legal and regulatory protection for investors in foreign markets than that available domestically. Additionally, trading on foreign exchanges is subject to the risks presented by exchange controls, expropriation, increased tax burdens and exposure to local economic declines and political instability. Some foreign derivative markets are so-called principals' markets in which performance is the responsibility only of the individual counterparty with whom the trader has entered into a commodity interest transaction and not of the exchange or clearing corporation. International trading activities are subject to foreign exchange risk. Certain foreign securities in which the Fund may invest may be traded in markets that close before the time that the Fund calculates its NAV. Furthermore, certain foreign securities in which the Fund invests may be listed on foreign exchanges that trade on weekends or other days when the Fund does not calculate its NAV. As a result, the value of the Fund's holdings may change on days when shareholders are not able to purchase or redeem the Fund's shares.
- **Futures and Forward Contracts and Related Risks:** The successful use of forward and futures contracts draws upon the Adviser's skill and experience with respect to such instruments and are subject to special risk considerations. The primary risks associated with the use of futures and forward contracts are:
 - Futures and forward contracts have a high degree of price variability and are subject to occasional rapid and substantial changes;
 - the imperfect correlation between the change in market value of the forward or futures contracts and the market value of the underlying instrument or reference assets with respect to such contracts;
 - possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired;

- possible market disruption or other extraordinary events, including but not limited to, governmental intervention;
- potentially unlimited losses caused by unanticipated market movements;
- the Fund's inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors;
- the possibility that the counterparty will default in the performance of its obligations; and
- if the Fund has insufficient cash, it may either have to sell securities from its portfolio to meet daily variation margin requirements with respect to its derivative instruments or close certain positions at a time when it may be disadvantageous to do so.

The use of futures contracts, forward contracts and derivative instruments will have the economic effect of financial leverage. Financial leverage magnifies exposure to the swings in prices of an asset class underlying an investment and results in increased volatility, which means the Fund will have the potential for greater losses than if the Fund did not employ leverage in its investment activity. Leveraging tends to magnify, sometimes significantly, the effect of any increase or decrease in the Fund's exposure to an asset class and may cause the value of the Fund's securities or related derivatives instruments to be volatile. Accordingly, the Fund's NAV may be volatile because of its investment exposure to the Fund.

There is no assurance that the Fund's investment in a derivative instrument with leveraged exposure to certain investments and markets will enable the Fund to achieve its investment objective.

- **General Market Risk:** The Fund's NAV and investment return will fluctuate based upon changes in the value of its portfolio securities. The value of investments held by the Fund may increase or decrease in response to economic, political, financial, public health crises (such as epidemics or pandemics) or other disruptive events (whether real, expected or perceived) in the U.S. and global markets. You could lose money on your investment in the Fund, or the Fund could underperform other investments.
- **Government Agency Risk:** Direct obligations of the U.S. Government such as U.S. Treasury bills, notes and bonds are supported by its full faith and credit. Indirect obligations issued by Federal agencies and government-sponsored entities generally are not backed by the full faith and credit of the U.S. Treasury. Accordingly, while U.S. Government agencies and instrumentalities may be chartered or sponsored by Acts of Congress, their securities are neither issued nor guaranteed by the U.S. Treasury. Some of these indirect obligations may be supported by the right of the issuer to borrow from the Treasury; others are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations; still others are supported only by the credit of the instrumentality. The maximum potential liability of the issuers of some U.S. Government securities may greatly exceed their current resources, including any legal right to support from the U.S. Treasury. It is possible that the issuers of such securities will not have the funds to meet their payment obligations in the future.
- **Government Intervention and Regulatory Changes:** The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") (which was passed into law in July 2010) significantly revised and expanded the rulemaking, supervisory and enforcement authority of federal bank, securities and commodities regulators. There can be no assurance that future regulatory actions including, but not limited to, those authorized by the Dodd-Frank Act will not adversely impact the Fund. Major changes resulting from legislative or regulatory actions could materially affect the profitability of the Fund or the value of investments made by the Fund or force the Fund to revise its investment strategy or divest certain of its investments. Any of these developments could expose the Fund to additional costs, taxes, liabilities, enforcement actions and reputational risk.

Rule 18f-4 under the 1940 Act provides for the regulation of a registered investment company's use of derivatives and certain related investments. Rule 18f-4 imposes limits on the amount of derivatives a fund can enter into, treats derivatives as senior securities so that a failure to comply with the limits would result in a statutory violation, and requires the Fund to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager. The Fund is required to comply with Rule 18f-4 and has adopted procedures for investing in derivatives and other transactions in compliance with Rule 18f-4.

- **Interest Rate Risk:** Interest rate risk is the risk that prices of fixed income securities generally increase when interest rates decline and decrease when interest rates increase. The Fund may lose money if short term or long term interest rates rise sharply or otherwise change in a manner not anticipated by the Adviser. Securities with longer maturities tend to be more sensitive to changes in interest rates, causing them to be more volatile than securities with shorter maturities. Securities with shorter maturities tend to provide lower returns and be less volatile than securities with longer maturities. Changing interest rates may have unpredictable effects on the markets and the Fund's investments and may also affect the liquidity of fixed income securities and instruments held by the Fund. Declines in interest rate levels could cause the Fund's earnings to fall below the Fund's expense ratio, resulting in a negative yield and a decline in the Fund's share price. In addition, certain countries and regulatory bodies may use negative interest rates as a monetary policy tool to encourage economic growth during periods of deflation. In a negative interest rate environment, debt instruments may trade at negative yields, which means the purchaser of the instrument may receive at maturity less than the total amount invested.
- **Leverage/Volatility Risk:** Although the Fund will not borrow funds for trading, the Fund should be considered highly leveraged and is suitable only for investors with high tolerance for investment risk. Leverage embedded in the various derivative instruments traded may result in the Fund or its Subsidiary holding positions whose face or notional value may be many times the Fund's NAV. For example, the amount of margin funds necessary to be deposited in order to enter into a futures, forward or option contract position is typically from 2% to 10% of the total face or notional value of the contract. As a result of this leveraging, even a small movement in the price of a commodity can cause a correspondingly large profit or loss. Losses incurred on leveraged investments increase in direct proportion to the degree of leverage employed. Furthermore, derivative instruments and futures contracts are highly volatile and are subject to occasional rapid and substantial fluctuations. Consequently, you could lose all or substantially all of your investment in the Fund should the Fund's trading positions suddenly turn unprofitable.

The Fund's NAV is expected over short-term periods to be volatile because of the significant use of direct and indirect investments that have a leveraging effect. Volatility is a statistical measurement of the magnitude of up and down asset price fluctuations over time. Rapid and dramatic price swings will result in high volatility. The Fund's returns are expected to be volatile; however, the actual or realized volatility level for longer or shorter periods may be materially higher or lower depending on market conditions and investors may suffer a significant and possibly a complete loss on their investment in the Fund.

- **Liquidity Risk:** The Fund is subject to liquidity risk primarily due to its investments in derivatives. Investments in derivative instruments involve the risk that the Fund may be unable to sell the derivative instrument or sell it at a reasonable price.
- **Management Risk:** The Adviser employs systematic modeling to make investment decisions about the attractiveness, value and potential positive or negative performance of the Fund. The models employed by the Adviser may prove to be inaccurate and may not produce the desired results.
- **Non-Diversification Risk:** The Fund is a non-diversified investment company, which means that more of the Fund's assets may be invested in the securities of a single issuer than could be invested in the securities of a single issuer by a diversified investment company. The Fund has a greater potential to realize losses upon the occurrence of adverse events affecting a particular issuer.
- **OTC Trading Risk:** Certain of the derivatives in which the Fund may invest may be traded (and privately negotiated) in the "over-the-counter" or "OTC" market. While the OTC derivatives market is the primary trading venue for many derivatives, it is largely unregulated. As a result, and similar to other privately negotiated contracts, the Fund is subject to counterparty credit risk with respect to such derivative contracts.
- **Portfolio Turnover Risk:** The Fund may frequently buy and sell portfolio securities and other assets to rebalance the Fund's exposure to various market sectors. Higher portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund's performance to be less than you expect.
- **Regulatory Risk:** Governments, agencies or other regulatory bodies may adopt or change laws or regulations that could adversely affect the issuer, or market value, of an instrument held by the Fund or its Subsidiary or that could adversely impact the Fund's performance.

- **Short Sales Risk:** The Fund may take a short position in a derivative instrument, such as a future, or forward, or swap or a security. A short position on a derivative instrument or security involves the risk of a theoretically unlimited increase in the value of the underlying instrument. Short sales also involve transaction and other costs that will reduce potential Fund gains and increase potential Fund losses.
- **Strategy Risk:** The profitability of any Fund investment depends primarily on the ability of the Adviser to anticipate price movements in the relevant markets and underlying derivative instruments and futures contracts. Such price movements may be influenced by, among other things:
 - changes in interest rates;
 - governmental, agricultural, trade, fiscal, monetary and exchange control programs and policies;
 - weather and climate conditions;
 - natural disasters, such as hurricanes;
 - changing supply and demand relationships;
 - changes in balances of payments and trade;
 - U.S. and international rates of inflation and deflation;
 - currency devaluations and revaluations;
 - U.S. and international political and economic events; and
 - changes in philosophies and emotions of various market participants.

The Fund may not take all of these factors into account.

- **Subsidiary Risk:** By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary's investments. The derivatives and other investments held by the Subsidiary are generally similar to those that are permitted to be held by the Fund and are subject to the same risks that apply to similar investments if held directly by the Fund. The Subsidiary is not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. Changes in the laws or acts of the United States and/or the Cayman Islands could result in the inability of the Fund and/or the Subsidiary to continue to operate as it does currently and could adversely affect the Fund.
- **Tax Risk:** In order to qualify as a regulated investment company ("RIC"), the Fund must meet certain requirements regarding the source of its income, the diversification of its assets and the distribution of its income. Under the test regarding the source of a RIC's income, at least 90% of the gross income of the RIC each year must be qualifying income, which consists of dividends, interest, gains on investment assets and other categories of investment income. Treasury Regulations provide that income from a foreign subsidiary that is a controlled foreign corporation is qualifying income for purposes of the Fund remaining qualified as a RIC for U.S. federal income tax purposes. Notwithstanding the treatment of controlled foreign corporations in the regulations, the Internal Revenue Services ("IRS") may take the position that income earned by the Fund through the Cayman Subsidiary may not be qualifying income because of its investment in commodities. Additionally, the IRS may take the position that certain commodity-linked structured notes may not be qualifying income. A recharacterization of income from the Cayman Subsidiary or commodity-linked structured notes could cause the Fund to fail to qualify as a RIC. If the Fund were to fail to qualify as a RIC and became subject to federal income tax, shareholders of the Fund would be subject to diminished returns. Changes in the laws or acts of the United States and/or the Cayman Islands could result in the inability of the Fund and/or its Subsidiary to operate as described in this Prospectus and the Statement of Additional Information ("SAI") and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Subsidiary. If Cayman Islands acts change such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

PERFORMANCE INFORMATION

Substantially all of the assets of the Equinox Campbell Strategy Fund, a series of Equinox Funds Trust (the "Predecessor Fund") were transferred to the Fund in a tax-free reorganization (the "Reorganization") that occurred on May 29, 2020. As a result of the Reorganization, the performance and accounting history of the Predecessor Fund prior to the date of the Reorganization was assumed by the Fund. Accordingly, the performance information shown below for periods prior to May 29, 2020, represents the performance of the Predecessor Fund.

The following performance information provides some indication of the risks of investing in the Fund. The chart shows changes in the Fund's performance of Class I Shares from year-to-year. The table shows how the average annual returns of Class I Shares for 1 year, 5 year, 10 year, and since-inception periods compare to the Fund's primary broad-based market index and a secondary index provided to offer additional market perspective. In accordance with new regulatory requirements, the Fund has selected the S&P 500 Total Return Index as the Fund's new primary benchmark. The Fund's former primary benchmark, the BarclayHedge BTOP50 Index, and SG CTA Index are also included for comparison. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at the Fund's website, www.campbell.com or by calling the Fund at 1-844-261-6488.

The following past performance information is not indicative of any future results that may be obtained by Campbell, and it should not be assumed that investors of the Fund will experience returns, if any, comparable to those experienced by past or present investors in the Fund or the Predecessor Fund or in other pools and accounts managed by Campbell. Because of the potentially volatile nature of futures and forward contract prices, it is possible that the performance of the Fund or of some or all of the other pools and accounts advised by Campbell may change significantly during the continuing offering from the performance information which may be presented herein.

ANNUAL RETURN – CLASS I FOR THE YEARS ENDED DECEMBER 31

During the period shown in the bar chart, the best performance for a quarter was 15.67% (for the quarter ended March 31, 2022). The worst performance was -12.62% (for the quarter ended June 30, 2015). The year-to-date total return for the nine months ended September 30, 2025 was 1.84%.

**AVERAGE ANNUAL TOTAL RETURNS
FOR THE PERIODS ENDED DECEMBER 31, 2024**

The following table, which includes all applicable sales charges (loads) and account fees, compares the Fund's Class I Shares, Class A Shares and Class C Shares average annual total returns for the periods indicated to the average annual total returns of broad-based securities market indices for the same periods. Past performance (before and after taxes) is not necessarily an indicator of how the Fund will perform in the future.

	ONE YEAR	FIVE YEARS	TEN YEARS	SINCE INCEPTION (03/08/2013) ⁽¹⁾
Average Annual Total Returns For the periods ended December 31, 2024				
Class I Shares				
Return Before Taxes	11.64%	10.12%	4.12%	5.34%
Return After Taxes on Distributions ⁽²⁾	10.34%	8.17%	2.02%	3.32%
Return After Taxes on Distributions and Sale of Fund Shares ⁽²⁾	6.88%	7.24%	2.26%	3.29%
Class A Shares				
Return Before Taxes	7.42%	9.04%	3.48%	4.75%
Class C Shares⁽³⁾				
Return Before Taxes	9.49%	9.00%	3.08%	4.37%
S&P 500 Total Return Index (reflects no deduction for fees, expenses or taxes)⁽⁴⁾	25.02%	14.53%	13.10%	14.03%
SG CTA Index (reflects no deduction for fees, expenses or taxes)⁽⁵⁾	2.36%	5.39%	2.62%	3.30%
BarclayHedge BTOP50 Index (reflects no deduction for fees, expenses or taxes)⁽⁶⁾	4.44%	6.34%	2.65%	3.17%

(1) The Predecessor Fund commenced operations on March 4, 2013. Start of performance is March 8, 2013.

(2) After-tax returns are based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and may differ from those shown. If you own shares of the Fund in a tax-deferred account, such as an individual retirement account or a 401(k) plan, this information is not applicable to your investment. In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period because a higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. After tax returns shown are for Class I Shares only, after tax returns for Class A Shares and Class C Shares will vary.

(3) Class I Shares and Class A Shares commenced operations on March 8, 2013, Class C Shares commenced operations on February 11, 2014. Performance shown prior to inception of the Class C Shares is based on the performance of Class I Shares, adjusted for the higher expenses applicable to Class C Shares.

(4) The S&P 500 Total Return Index is a widely accepted, unmanaged index of U.S. stock market performance which does not take into account charges, fees and other expenses. Investors cannot invest directly in an index.

(5) The SG CTA Index is an equally weighted index. It is calculated daily using a pool of CTAs selected from the larger managers that are open to new investment. The index is rebalanced annually. The SG CTA Index is derived from data which is self-reported by investment managers based on the performance of privately managed funds. Investors cannot invest directly in an index.

(6) The BarclayHedge BTOP50 Index ("BTOP50 Index") seeks to replicate the overall composition of the managed futures industry with regard to trading style and overall market exposure. The BTOP50 Index employs a top-down approach in selecting its constituents. The largest investable trading advisor programs, as measured by assets under management, are selected for inclusion in the BTOP50 Index. In each calendar year the selected trading advisors represent, in aggregate, no less than 50% of the investable assets of the Barclay CTA Universe. For 2025 there are 20 constituents in the BTOP50 Index. Investors cannot invest directly in an index.

MANAGEMENT OF THE FUND

Investment Adviser

Campbell & Company Investment Adviser LLC, 2850 Quarry Lake Drive, Suite 100, Baltimore, Maryland 21209, serves as the investment adviser to the Fund.

Portfolio Managers

The Campbell Systematic Macro Program is managed by Campbell's Investment Committee. The team, co-chaired by Dr. Kevin Cole and Dr. Grace Lo, has been responsible for the daily management of the Campbell Systematic Macro Program since its inception. John R. Radle, Campbell's Chief Operating Officer, is responsible for the management of the Fund's cash management program and serves alongside Dr. Kevin Cole and Dr. Grace Lo as portfolio managers of the Fund.

PURCHASE AND SALE INFORMATION

The Fund offers Class A Shares, Class I Shares, and Class C Shares. Each Class of the Fund's Shares has a pro rata interest in the Fund's investment portfolio, but differs as to expenses, distribution arrangements and the types of investors who may be eligible to invest in the share class. Class A Shares and Class C Shares are designed for individual and retail investors. Class I Shares are designed for institutional investors. Certain classes of Shares of the Fund may be available through certain brokerage firms, financial institutions and other industry professionals (collectively, "Service Organizations") that make the Shares available to their clients.

The minimum initial investment is \$10,000 for Class I Shares. The minimum initial investment for Class A and Class C Shares is \$2,500. The minimum amount for subsequent investments for Class A Shares is \$500. There is no minimum amount for subsequent investments for Class I Shares and Class C Shares. The Fund has the discretion to further modify, waiver or reduce the above investment minimum requirements.

Investors or financial advisers may aggregate accounts for purposes of determining whether the above minimum requirements have been met. Investors or financial advisers may also enter into letters of intent indicating that they intend to meet the minimum investment requirements within an 18-month period. This does not apply to Class C Shares.

You can only purchase and redeem Shares of the Fund on days the New York Stock Exchange ("NYSE") is open. Shares of the Fund may be available through certain Service Organizations. Shares of the Fund may also be purchased and redeemed directly through The RBB Fund, Inc. (the "Company") by the means described below.

PURCHASE AND REDEMPTION BY MAIL:

Regular Mail:

Campbell Systematic Macro Fund
c/o U.S. Bank Global Fund Services
P.O. Box 219252
Kansas City, MO 64121-9252

Overnight Delivery:

Campbell Systematic Macro Fund
c/o U.S. Bank Global Fund Services
801 Pennsylvania Avenue 219252
Kansas City, MO 64105-1307

PURCHASE BY WIRE:

Before sending any wire, call U.S. Bancorp Fund Services, LLC (the "Transfer Agent") at 1-844-261-6488 to confirm the current wire instructions for the Fund.

REDEMPTION BY TELEPHONE:

Call the Transfer Agent at 1-844-261-6488.

TAXES

The Fund intends to make distributions that generally may be taxed at ordinary income or capital gains rates.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund may pay the intermediary for the sale of Shares and other related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

FUND INFORMATION

MORE INFORMATION ABOUT FUND INVESTMENTS

This section provides some additional information about the Fund's investments and certain portfolio management techniques that the Fund may use. More information about the Fund's investments and portfolio management techniques, and related risks, is included in the SAI.

The investment objective of the Fund is to seek capital appreciation over the medium to long-term. The Fund's investment objective is non-fundamental and may be changed by the Board of Directors of the Company (the "Board") without the approval of the Fund's shareholders. However, as a matter of policy, the Fund would not materially change its investment objective without informing shareholders at least 60 days in advance of any such change.

The investments and strategies described in this Prospectus are those that the Fund uses under normal conditions. The Fund may depart from its principal investment strategy in response to adverse market, economic, political or other conditions by taking temporary defensive positions (up to 100% of its assets) in cash, cash equivalents and short-term U.S. government securities. If the Fund were to take a temporary defensive position, it may be unable for a time to achieve its investment objective.

This Prospectus describes the Fund's principal investment strategies, and the Fund will normally invest in the types of securities and other instruments described in this Prospectus. In addition to the investments and strategies described in this Prospectus, the Fund also may invest, to a lesser extent, in other securities, use other strategies and engage in other investment practices that are not part of its principal investment strategy. These investments and strategies, as well as those described in this Prospectus, are described in detail in the Fund's SAI. Of course, there is no guarantee that the Fund will achieve its investment objective.

MORE INFORMATION ABOUT RISKS

The following provides additional information about the principal and certain non-principal risks of investing in the Fund and, indirectly, in the Subsidiary. More information about the Fund's risks is included in the SAI.

Principal Risks

Commodities Risk: Exposure to the commodities markets (including financial futures markets) may subject the Fund through its investment in the Subsidiary to greater volatility than investments in traditional securities. The values of commodities and commodity-linked investments are affected by events that might have less impact on the values of stocks and bonds and have recently experienced periods of significant volatility. Prices of commodities and related contracts may fluctuate significantly over short periods for a variety of reasons, including changes in interest rates or factors affecting a particular industry or commodity, such as weather, disease (including pandemics), tariffs, embargoes or other trade barriers, acts of war or terrorism, or political and regulatory developments.

The commodity markets are subject to temporary distortions or other disruptions. U.S. futures exchanges and some foreign exchanges have regulations that limit the amount of fluctuation in futures contract prices, which may occur during a single business day. Once a limit price has been reached in a particular contract, no trades may be made at a different price. Limit prices have the effect of precluding trading in a particular contract or forcing the liquidation of contracts at disadvantageous times or prices. These circumstances could adversely affect the value of the Fund's commodity-linked investments.

Counterparty Risk: Some of the derivatives entered into by the Fund or the Subsidiary are not traded on an exchange but instead will be privately negotiated in the over-the-counter ("OTC") market. This means that these instruments are traded between counterparties based on contractual relationships. The participants in the over-the-counter market are typically not subject to credit evaluations and regulatory oversight as are members of "exchange based" markets. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of the Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the

potential for losses by the Fund. In situations in which the Fund is required to post margin or other collateral with a counterparty, including with a futures commission merchant or a clearing organization for futures or other derivative contracts, the counterparty may fail to segregate the collateral or may commingle the collateral with the counterparty's own assets. As a result, in the event of the counterparty's bankruptcy or insolvency, the Fund's collateral may be subject to the conflicting claims of the counterparty's creditors and the Fund may be exposed to the risk of being treated as a general unsecured creditor of the counterparty, rather than as the owner of the collateral.

The Fund is subject to the risk that issuers of the instruments in which it invests and trades may default on their obligations, and that certain events may occur that have an immediate and significant adverse effect on the value of those instruments. There can be no assurance that an issuer will not default, or that an event that has an immediate and significant adverse effect on the value of an instrument will not occur, and that the Fund will not sustain a loss on a transaction as a result.

Transactions entered into by the Fund may be executed on various U.S. and non-U.S. exchanges, and may be cleared and settled through various clearing houses, custodians, depositories and prime brokers throughout the world. A failure by any such entity may lead to a loss to the Fund.

Credit Risk: Credit risk refers to the possibility that the issuer of the security will not be able to make principal and interest payments when due. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer. The Adviser cannot guarantee the adequacy of the protection of the Fund's interests, including the validity or enforceability of the loan and the maintenance of the anticipated priority and perfection of the applicable security interests. Furthermore, the Adviser cannot assure that claims may not be asserted that might interfere with enforcement of the rights of the holder(s) of the relevant debt. There can be a lag between the time of developments relating to an issuer and the time a rating is assigned and updated. The degree of credit risk depends on both the financial condition of the issuer and the terms of the obligation. Securities rated in the four highest categories (S&P Global Ratings ("S&P") (AAA, AA, A and BBB), Fitch Ratings ("Fitch") (AAA, AA, A and BBB) or Moody's Investors Service, Inc. ("Moody's") (Aaa, Aa, A and Baa) by the rating agencies are considered investment grade but they may also have some speculative characteristics, meaning that they carry more risk than higher rated securities and may have problems making principal and interest payments in difficult economic climates. Investment grade ratings do not guarantee that bonds will not lose value or default.

If a security issuer defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. Lower credit quality may lead to greater volatility in the price of a security and in shares of the Fund. Lower credit quality also may affect liquidity and make it difficult to sell the security. Default, or the market's perception that an issuer is likely to default, could reduce the value and liquidity of securities, thereby reducing the value of your investment in Fund shares. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings.

When the Fund invests in over-the-counter derivatives (including options), it is assuming a credit risk with regard to the party with which it trades and also bears the risk of settlement default. These risks may differ materially from risks associated with transactions effected on an exchange, which generally are backed by clearing organization guarantees, daily mark-to-market and settlement, segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from such protections. Relying on any counterparty exposes the Fund to the risk that such counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If any counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease.

In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of the Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund.

Although U.S. Government Securities are generally considered to be among the safest type of investment in terms of credit risk, they are not guaranteed against price movements due to changing interest rates. From time to time, uncertainty regarding the status of negotiations in the U.S. Government to increase the statutory debt ceiling could impact the creditworthiness of the U.S. and could impact the liquidity of the U.S. Government Securities markets and ultimately the Funds. Obligations issued by some U.S. Government agencies, authorities, instrumentalities or sponsored enterprises, such as the Government National Mortgage Association ("GNMA"), are backed by the full faith and credit of

the U.S. Treasury, while obligations by others, such as Federal National Mortgage Association (“Fannie Mae”), Federal Home Loan Mortgage Corporation (“Freddie Mac”) and Federal Home Loan Banks (“FHLBs”), are backed solely by the ability of the entity to borrow from the U.S. Treasury or by the entity’s own resources. No assurance can be given that the U.S. Government would provide financial support to U.S. Government agencies, authorities, instrumentalities or sponsored enterprises if it is not obliged to do so by law.

Currency Risk: The Fund’s exposure to foreign currencies subjects the Fund to the risk that those currencies will decline in value relative to the U.S. Dollar, or, in the case of short positions, that the U.S. Dollar will decline in value relative to the currency that the Fund is short. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, rates of inflation, governmental surpluses or deficits, intervention (or the failure to intervene) by U.S. or foreign governments, actions of central banks or supranational entities and the imposition of currency controls or other political developments in the U.S. or abroad. In addition, the Fund may incur transaction costs in connection with conversions between various currencies. Currency risk may be particularly high to the extent that the Fund invests in foreign currencies or engages in foreign currency transactions that are economically tied to emerging market countries. These currency transactions may present market, credit, currency, liquidity, legal, political, and other risks different from, or greater than, the risks of investing in developed foreign currencies or engaging in foreign currency transactions that are economically tied to developed foreign countries.

Cyber Security Risk: With the increased use of technologies such as the internet to conduct business, the Fund and Subsidiary are susceptible to operational, information security and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber-attacks include, but are not limited to, gaining unauthorized access to digital systems (*e.g.*, through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information (including private shareholder information), corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber security failures or breaches by the Adviser and other service providers (including, but not limited to, the Fund’s accountant, custodian, transfer agent and administrator), and the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund’s ability to calculate its NAV, impediments to trading, the inability of Fund shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. The use of artificial intelligence and machine learning could exacerbate these risks or result in cyber security incidents that implicate personal data. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Adviser has established business continuity plans in the event of, and risk management systems to prevent, such cyberattacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund and issuers in which the Fund invests, and such third-party service providers may have limited indemnification obligations to the Fund or the Adviser. The Fund and its shareholders could be negatively impacted as a result.

Derivatives Risk: Derivatives include instruments and contracts that are based on, and are valued in relation to, one or more underlying securities, financial benchmarks or indices, such as futures, options, swap agreements and forward contracts. The value of a derivative depends largely upon price movements in the underlying instrument. Many of the risks applicable to trading the underlying instrument are also applicable to derivatives trading. However, derivatives trading is subject to a number of additional risks. Transactions in certain derivatives are subject to clearance on a U.S. national exchange and to regulatory oversight, while other derivatives are subject to risks of trading in the over-the-counter markets or on non-U.S. exchanges. A small investment in derivative instruments could have a potentially large impact on the Fund’s performance. Over-the-counter derivatives are subject to the risk of mispricing or improper valuation of the derivative. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments.

Rule 18f-4 under the 1940 Act imposes limits on the amount of derivatives a fund can enter into, treats derivatives as senior securities so that a failure to comply with the limits would result in a statutory violation, and requires the Fund to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager. The Fund is required to comply with Rule 18f-4 and has adopted procedures for investing in derivatives and other transaction in compliance with Rule 18f-4. The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues,

settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

Liquidity of Futures Contracts. The Fund utilizes futures as part of its strategy. Futures positions may be illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as “daily price fluctuation limits” or “daily limits.” Under such daily limits, during a single trading day no trades may be executed at prices beyond the daily limits. Once the price of a particular futures contract has increased or decreased by an amount equal to the daily limit, positions in that contract can neither be entered into nor liquidated unless traders are willing to effect trades at or within the limit. Futures prices have occasionally moved beyond the daily limits for several consecutive days with little or no trading. OTC instruments generally are not as liquid as instruments traded on recognized exchanges. These constraints could prevent the Fund from promptly liquidating unfavorable positions, thereby subjecting the Fund to substantial losses. In addition, the Commodity Futures Trading Commission (“CFTC”) and various exchanges limit the number of positions that the Fund may indirectly hold or control in particular commodities.

Non-U.S. Futures Transactions. Foreign futures transactions involve the execution and clearing of trades on a foreign exchange. This is the case even if the foreign exchange is formally “linked” to a domestic exchange, whereby a trade executed on one exchange liquidates or establishes a position on the other exchange. No domestic organization regulates the activities of a foreign exchange, including the execution, delivery, and clearing of transactions on such an exchange, and no domestic regulator has the power to compel enforcement of the rules of the foreign exchange or the laws of the foreign country. Moreover, such laws or regulations will vary depending on the foreign country in which the transaction occurs. For these reasons, the Fund may not be afforded certain of the protections that apply to domestic transactions. Additionally, foreign market trading hours, clearance and settlement procedures, and holiday schedules may limit a Fund’s ability to buy and sell securities. In particular, funds received from the Fund to margin (collateralize) foreign futures transactions may not be provided the same protections as funds received to margin futures transactions on domestic exchanges. In addition, the price of any foreign futures or option contract and, therefore, the resulting potential profit or loss, may be affected by any fluctuation in the foreign exchange rate between the time the order is placed and the foreign futures contract is liquidated or the foreign option contract is liquidated or exercised.

Forward Contracts. The Fund may utilize deliverable and non-deliverable forward contracts that are not traded on exchanges and may not be regulated. There are no limitations on daily price movements of forward contracts. Banks and other dealers with which the Fund maintains accounts may require that the Fund deposit margin with respect to such trading. The Fund’s counterparties are not required to continue making markets in such contracts. There have been periods during which certain counterparties have refused to continue to quote prices for forward contracts or have quoted prices with an unusually widespread (the price at which the counterparty is prepared to buy and that at which it is prepared to sell). Arrangements to trade forward contracts may be made with only one or a few counterparties, and liquidity problems therefore might be greater than if such arrangements were made with numerous counterparties. The Fund may trade forward contracts in the inter-bank currency market, whereby banks and dealers act as principals in these markets. As a result of Dodd-Frank, the CFTC now regulates non-deliverable forwards (including deliverable forwards where the parties do not take delivery). Changes in the forward markets may entail increased costs and result in burdensome reporting requirements. The imposition of credit controls by governmental authorities might limit such forward trading to less than the amount that the Adviser would otherwise recommend, to the possible detriment of the Fund.

Swap Agreements. The Fund may enter into swap agreements. Swap agreements can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors. Depending on their structure, swap agreements may increase or decrease the Fund’s exposure to long-term or short-term interest rates, foreign currency values, corporate borrowing rates, or other factors such as security prices, baskets of securities, or inflation rates. Swap agreements can take many different forms and are known by a variety of names. The Fund is not limited to any particular form of swap agreement if the Adviser determines that other forms are consistent with the Fund’s investment objective and policies.

Swap agreements will tend to shift the Fund’s investment exposure from one type of investment to another. For example, if the Fund agrees to exchange payments in dollars for payments in foreign currency, the swap agreement would tend to decrease the Fund’s exposure to U.S. interest rates and increase its exposure to foreign currency and interest rates. Depending on how they are used, swap agreements may increase or decrease the overall volatility of the Fund’s portfolio. The most significant factor in the performance of swap agreements is the change in the specific interest rate, currency, individual equity values or other factors that determine the amounts of payments due to and from the

Fund. If a swap agreement calls for payments by the Fund, the Fund must be prepared to make such payments when due. In addition, the value of a swap agreement is likely to decline if the counterparty's creditworthiness declines. Such a decrease in value might cause the Fund to incur losses.

Emerging Market Risk: The Fund intends to have exposure to emerging markets due to its investments in certain stock index futures and foreign exchange instruments. Investing in emerging markets will, among other things, expose the Fund to all the risks described below in the Foreign Market Risk section, and you should review that section carefully. However, there are greater risks involved in investing in emerging market countries and/or their financial markets than there are in more developed countries and/or markets. Generally, economic structures in these countries are less diverse and mature than those in developed countries, and their political systems are less stable. Investments in emerging market countries may be affected by national policies that restrict foreign investment in certain issuers or industries. The small size of their financial markets and low trading volumes can make investments illiquid and more volatile than investments in developed countries and such securities may be subject to abrupt and severe price declines. The information available about an emerging market issuer may be less reliable than for comparable issuers in more developed capital markets. The Fund may be required to establish special custody or other arrangements before investing. In addition, because the securities settlement procedures are less developed in these countries, the Fund may be required to deliver securities before receiving payment and may also be unable to complete transactions during market disruptions. The possible establishment of exchange controls or freezes on the convertibility of currency might adversely affect an investment in assets traded in foreign markets. Further, investments in certain emerging markets are subject to an elevated risk of loss resulting from market manipulation. The legal rights and remedies available for investors in emerging markets may be more limited than the rights and remedies available in the U.S., and the ability of the U.S. authorities (*e.g.*, SEC and the U.S. Department of Justice) to bring actions against bad actors in emerging markets may be limited.

Fixed-Income Risk: A substantial portion of the Fund's assets may be invested in securities issued by the U.S. Government. When interest rates change, the value of the Fund's fixed-income investments will be affected. Prices of fixed income securities tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect fixed income security prices and, accordingly, the Fund's share price. The longer the effective maturity and duration of the Fund's portfolio, the more the Fund's share price is likely to react to interest rates. Some fixed income securities give the issuer the option to call, or redeem, the securities before their maturity dates. If an issuer calls its security during a time of declining interest rates, the Fund might have to reinvest the proceeds in an investment offering a lower yield, and therefore might not benefit from any increase in value as a result of declining interest rates. During periods of market illiquidity or rising interest rates, prices of callable issues are subject to increased price fluctuation. In addition, the Fund may be subject to extension risk, which occurs during a rising interest rate environment because certain obligations will be paid off by an issuer more slowly than anticipated, causing the value of those securities held by the Fund to fall.

Fixed income investments are also subject to "Credit Risk" discussed herein.

Foreign Market Risk: A substantial portion of the trades of the Fund are expected to take place on markets or exchanges outside the United States. There is no limit to the amount of assets of the Fund that may be committed to trading on foreign markets. The risk of loss in trading foreign futures and options on futures contracts can be substantial. Participation in foreign futures and options on futures contracts involves the execution and clearing of trades on, or subject to the rules of, a foreign board of trade or exchange. Some of these foreign markets, in contrast to U.S. exchanges, are so-called principals' markets in which performance is the responsibility only of the individual counterparty with whom the trader has entered into a commodity interest transaction and not of the exchange or clearing corporation. In these kinds of markets, there is risk of bankruptcy or other failure or refusal to perform by the counterparty.

Some foreign markets present additional risk, because they are not subject to the same degree of regulation as their U.S. counterparts. No U.S. regulatory agency or any domestic exchange regulates activities on any foreign boards of trade or exchanges (such as the execution, delivery and clearing of transactions) or has the power to compel enforcement of the rules of a foreign board of trade or exchange or of any applicable foreign laws. Similarly, the rights of market participants, in the event of the insolvency or bankruptcy of a foreign market or broker are also likely to be more limited than in the case of U.S. markets or brokers. As a result, in these markets, there is less legal and regulatory protection than that available domestically.

Additionally, trading on foreign exchanges is subject to the risks presented by exchange controls, expropriation, increased tax burdens, less public information and exposure to local economic declines and political instability. An adverse development with respect to any of these variables could reduce the profit or increase the loss earned on trades in the affected international markets. International trading activities are subject to foreign exchange risk.

Recently, various countries have seen significant internal conflicts and in some cases, civil wars may have had an adverse impact on the securities markets of the countries concerned. In addition, the occurrence of new disturbances due to acts of war or terrorism or other political developments cannot be excluded. Nationalization, expropriation or confiscatory taxation, currency blockage, political changes, government regulation, political, regulatory or social instability or uncertainty or diplomatic developments, including the imposition of sanctions or other similar measures, could adversely affect the Fund's investments.

Recent examples of the above include conflict, loss of life and disaster connected to ongoing armed conflict in Europe and the Middle East. The extent, duration and impact of these conflicts, related sanctions and retaliatory actions are difficult to ascertain, but could be significant and have severe adverse effects on the region, including significant adverse effects on the regional or global economies and the markets for certain securities and commodities. These impacts could negatively affect the Fund's investments in securities and instruments that are economically tied to the applicable region, and include (but are not limited to) declines in value and reductions in liquidity. In addition, to the extent new sanctions are imposed or previously relaxed sanctions are reimposed (including with respect to countries undergoing transformation), complying with such restrictions may prevent the Fund from pursuing certain investments, cause delays or other impediments with respect to consummating such investments or divestments, require divestment or freezing of investments on unfavorable terms, render divestment of underperforming investments impracticable, negatively impact the Fund's ability to achieve their investment objectives, prevent the Fund from receiving payments otherwise due, increase diligence and other similar costs to the Fund, render valuation of affected investments challenging, or require the Funds to consummate an investment on terms that are less advantageous than would be the case absent such restrictions. Any of these outcomes could adversely affect the Fund's performance with respect to such investments, and thus the Fund's performance as a whole.

General Market Risk: The Fund's NAV and investment return will fluctuate based upon changes in the value of its portfolio securities. The market value of securities in which the Fund or the Subsidiary invests is based upon the market's perception of value and is not necessarily an objective measure of a security's value. There is no assurance that the Fund will realize its investment objective, and an investment in the Fund is not, by itself, a complete or balanced investment program. You could lose money on your investment in the Fund, or the Fund could underperform other investments.

Periods of unusually high financial market volatility and restrictive credit conditions, at times limited to a particular sector or geographic area, have occurred in the past and may be expected to recur in the future. Some countries, including the United States, have adopted or have signaled protectionist trade measures, relaxation of the financial industry regulations that followed the financial crisis, and/or reductions to corporate taxes. The current presidential administration has called for and is seeking to quickly enact significant changes to U.S. fiscal, tax, trade, healthcare, immigration, foreign, and government regulatory policy. Significant uncertainty exists with respect to legislation, regulation and government policy at the federal level, as well as the state and local levels. Recent events have created a climate of heightened uncertainty and introduced new and difficult-to-quantify macroeconomic and political risks with potentially far-reaching implications. There has been a corresponding meaningful increase in the uncertainty surrounding interest rates, inflation, foreign exchange rates, trade volumes and fiscal and monetary policy. To the extent the U.S. Congress or the current presidential administration implements changes to U.S. policy, those changes may impact, among other things, the U.S. and global economy, international trade and relations, unemployment, immigration, corporate taxes, healthcare, the U.S. regulatory environment, inflation and other areas. Although the Fund cannot predict the impact, if any, of these changes to the Fund's business, they could adversely affect the Fund's business, financial condition, operating results and cash flows. Until the Fund knows what policy changes are made and how those changes impact the Fund's business and the business of the Fund's competitors over the long term, the Fund will not know if, overall, the Fund will benefit from them or be negatively affected by them.

Additionally, climate change poses long-term threats to physical and biological systems. Potential hazards and risks related to climate change for a State or municipality include, among other things, wildfires, rising sea levels, more severe coastal flooding and erosion hazards, and more intense storms. Storms in recent years have demonstrated vulnerabilities in a State's or municipality's infrastructure to extreme weather events. Climate change risks, if they materialize, can adversely impact a State's or municipality's financial plan in current or future years. In addition, economists and others have expressed increasing concern about the potential effects of global climate change on property and security values.

A rise in sea levels, an increase in powerful windstorms and/or a climate-driven increase in sea levels or flooding could cause coastal properties to lose value or become unmarketable altogether. Economists warn that, unlike previous declines in the real estate market, properties in affected coastal zones may not ever recover their value. Large wildfires driven by high winds and prolonged drought may devastate businesses and entire communities and may be very costly to any business found to be responsible for the fire. Regulatory changes and divestment movements tied to concerns about climate change could adversely affect the value of certain land and the viability of industries whose activities or products are seen as accelerating climate change. The Fund cannot predict the effects of or likelihood of such events on the U.S. and world economies. The Fund could be materially impacted by such events which may, in turn, negatively affect the value and performance the Fund.

Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. As the use of technology grows, liquidity and market movements may be affected. As artificial intelligence is used more widely, the profitability and growth of Fund holdings may be impacted, which could significantly impact the overall performance of the Fund.

Government Intervention and Regulatory Changes: The Dodd-Frank Act significantly revised and expanded the rulemaking, supervisory and enforcement authority of federal bank, securities and commodities regulators. There can be no assurance that future regulatory actions, including, but not limited to, those authorized by the Dodd-Frank Act will not adversely impact the Fund. Major changes could materially affect the profitability of the Fund or the value of investments made by the Fund or force the Fund to revise its investment strategy or divest certain of its investments. Any of these developments could expose the Fund to additional costs, taxes, liabilities, enforcement actions and reputational risk. In addition, Rule 18f-4 under the 1940 Act governing the use of derivatives by registered investment companies became effective on August 19, 2022. See the section entitled “Derivatives Risk” above for additional information.

Leverage/Volatility Risk: Although the Fund will not borrow funds for trading, the Fund should be considered highly leveraged and is suitable only for investors with high tolerance for investment risk. Leverage embedded in the various derivative instruments traded may result in the Fund or its Subsidiary holding positions whose face or notional value may be many times the Fund’s NAV. For example, the amount of margin funds necessary to be deposited in order to enter into a futures, forward or option contract position is typically from 2% to 10% of the total face or notional value of the contract. As a result of this leveraging, even a small movement in the price of a commodity can cause a correspondingly large profit or loss. Losses incurred on leveraged investments increase in direct proportion to the degree of leverage employed.

Furthermore, derivative contracts are highly volatile and are subject to occasional rapid and substantial fluctuations. Consequently, you could lose all or substantially all of your investment in the Fund should the trading positions of the Fund suddenly turn unprofitable.

The Fund’s NAV is expected over short-term periods to be volatile because of the significant use of direct and indirect investments that have a leveraging effect. Volatility is a statistical measurement of the magnitude of up and down asset price fluctuations over time. Rapid and dramatic price swings will result in high volatility. The Fund’s returns are expected to be volatile; however, the actual or realized volatility level for longer or shorter periods may be materially higher or lower depending on market conditions and investors may suffer a significant and possibly a complete loss on their investment in the Fund.

Liquidity Risk: The Fund may be subject to liquidity risk primarily due to investments in derivatives. The Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment is an investment that the fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the security. Derivatives, such as swaps, options and warrants, may not be readily marketable and, therefore, may be deemed to be illiquid. Investments in illiquid assets involve the risk that the Fund may be unable to sell the asset or sell it at a reasonable price. In addition, the Fund may be required to liquidate positions or close out derivatives on unfavorable terms at a time contrary to the interests of the Fund in order to raise cash to pay redemptions.

Pursuant to Rule 22e-4 (the “Liquidity Rule”) under the 1940 Act, the Company has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to the Liquidity Rule. If the limitation on illiquid investments is exceeded, the condition will be reported to the Board and, when required by the Liquidity Rule, to the SEC.

The Adviser will monitor the liquidity of restricted securities in the Fund under the supervision of the Board. In reaching liquidity decisions, the Adviser may consider, among others, the following factors: (1) the frequency of trades and quotes for the security; (2) the number of dealers wishing to purchase or sell the security and the number of other potential purchasers; (3) dealer undertakings to make a market in the security; and (4) the nature of the security and the nature of the marketplace trades (*e.g.*, the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer).

An investment in derivatives is also subject to the risk that the Fund may not be able to terminate the derivatives effective on whatever date it chooses, or that the settlement of any early termination may depend on subsequent market movements. As a result, the Fund may be exposed to the risk of additional losses due to such delays.

Management Risk: The Adviser's judgments about the attractiveness, value and potential positive or negative performance of any particular security or derivative in which the Fund invests or sells short may prove to be inaccurate and may not produce the desired results. The Adviser's trading is highly model driven and is materially subject to possible flaws in the models. As market dynamics (for example, due to changed market conditions and participants) shift over time, a previously highly successful model often becomes outdated or inaccurate, sometimes without the Adviser recognizing that fact before substantial losses are incurred. In particular, the Fund may incur major losses in the event of disrupted markets and other extraordinary events that cause the Adviser's pricing models to generate prices which deviate from the market. The risk of loss to the Fund in the case of disrupted markets is compounded by the number of different investment models of pricing, each of which may independently become wholly unpredictable during market disruptions. In addition, in disrupted derivatives markets, many positions may become illiquid, making it difficult or impossible to close out positions against which the markets are moving.

Even if the basic concepts of its models are sound, the Adviser may make errors in developing algorithms for integrating the numerous factors and variables into them or in programming the algorithms. Those errors may cause the model to generate results different from those intended. They may be difficult to detect in many market conditions, possibly influencing outcomes only in periods of stress or change in market conditions.

The Adviser anticipates the continued modification, enhancement and development of models. Each new generation of models (including incremental improvements to current models) exposes the Fund to the possibility of unforeseen losses from a variety of factors, including conceptual failures and implementation failures. There can be no assurance that the models used by the Adviser will be effective or that they will be effectively utilized by the Adviser. Moreover, these can be no assurance that the Adviser will be able to continue to develop, maintain and update the models so as to effectively implement its trading strategy.

Non-Diversification Risk: The Fund is a non-diversified investment company, which means that more of the Fund's assets may be invested in the securities of a single issuer than could be invested in the securities of a single issuer by a diversified investment company. This may make the value of the Fund's shares more susceptible to certain risks than shares of a diversified investment company. As a non-diversified fund, the Fund has a greater potential to realize losses upon the occurrence of adverse events affecting a particular issuer.

OTC Trading Risk: Certain of the derivatives in which the Fund may invest, including swap agreements, may be traded (and privately negotiated) in the OTC market. While the OTC derivatives market is the primary trading venue for many derivatives, it is largely unregulated and lacks transparency with respect to the terms of OTC transactions. OTC derivatives are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the Fund. In addition, such derivative instruments are often highly customized and tailored to meet the needs of the counterparties. If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price. As a result, and similar to other privately negotiated contracts, the Fund is subject to counterparty credit risk with respect to such derivative contracts.

Portfolio Turnover Risk: The Fund may frequently buy and sell portfolio securities and other assets to rebalance the Fund's exposure to various market sectors. Higher portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund's performance to be less than you expect.

Regulatory Risk: Governments, agencies or other regulatory bodies may adopt or change laws or regulations that could adversely affect the issuer, or market value, of an instrument held by the Fund or the Fund's performance.

Short Sales Risk: The Fund engages in short sales of derivative instruments and securities – including those that are not “against the box,” which means that the Fund may make short sales where the Fund does not currently own or have the right to acquire, at no added cost, instruments identical to those sold short – in accordance with the provisions of the 1940 Act. In a typical short sale, the Fund borrows from a broker an instrument in order to sell the instrument to a third party. The Fund then is obligated to replace the instrument borrowed by purchasing it at the market price at the time of replacement. The Fund realizes a loss to the extent the instrument increases in value or a profit to the extent the instrument declines in value (after taking into account any associated costs).

Strategy Risk: The Fund’s strategy involves actively trading derivative instruments using a variety of strategies and investment techniques that involve significant risks. Such derivative instruments may include futures, options and forward contracts and other derivative instruments that have inherent leverage and price volatility that result in greater risk than instruments used by a typical mutual fund, and the systematic programs used to trade them may rely on proprietary investment strategies that are not fully disclosed, which may in turn result in risks that are not anticipated.

The use of futures contracts, forward contracts and derivative instruments will have the economic effect of financial leverage. Financial leverage magnifies exposure to the swings in prices of an asset class underlying an investment and results in increased volatility, which means the Fund, through its investment in a derivative instrument, will have the potential for greater losses than if the Fund did not employ leverage in its investment activity. Leveraging tends to magnify, sometimes significantly, the effect of any increase or decrease in the Fund’s exposure to an asset class and may cause the value of the Fund’s investment to be volatile.

There is no assurance that the Fund’s investment in a derivative instrument with leveraged exposure to certain investments and markets will enable the Fund to achieve its investment objective.

Subsidiary Risk: The Fund will make investments through a wholly-owned Subsidiary organized under the acts of the Cayman Islands. By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary’s investments. The derivatives and other investments held by a Subsidiary are generally similar to those that are permitted to be held by the Fund and are subject to the same risks that apply to similar investments if held directly by the Fund. These risks are described elsewhere in this Prospectus. There can be no assurance that the investment objective of the Subsidiary will be achieved.

The Subsidiary is not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. However, the Fund wholly owns and controls the Subsidiary, making it unlikely that the Subsidiary will take action contrary to the interests of the Fund and its shareholders. The Board has oversight responsibility for the investment activities of the Fund, including its investment in the Subsidiary, and the Fund’s role as sole shareholder of the Subsidiary. The Subsidiary will be subject to the same investment restrictions and limitations, and follow the same compliance policies and procedures, as the Fund.

Changes in the laws or acts of the United States and/or the Cayman Islands could result in the inability of the Fund and/or its Subsidiary to operate as described in this Prospectus and in the SAI and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

Tax Risk: There is a risk that the IRS could assert that the income derived from the Fund’s investment in the Subsidiary or in certain commodity-linked structured notes will not be considered qualifying income for purposes of the Fund remaining qualified as a RIC for U.S. federal income tax purposes. In 2006, the IRS had published a ruling that income realized from swaps with respect to a commodities index would not be qualifying income. In a number of private letter rulings issued during 2006-2011, the IRS ruled that the income of such a foreign subsidiary would be qualified income each year even if it is not actually distributed to the RIC each year, but in 2011 the IRS suspended the issuance of such rulings. The IRS has finalized Treasury Regulations that provide that the income from a foreign subsidiary that is a controlled foreign corporation is qualifying income for purposes of a fund remaining qualified as a RIC for U.S. federal income tax purposes (1) to the extent the income is actually distributed by the foreign subsidiary to the RIC each year and (2) even if not distributed currently, to the extent the income is derived with respect to the fund’s business of investing in stock, securities or currencies. In addition, during 2006-2011, the IRS had also issued private letter rulings to regulated investment companies concluding that income derived from their investment in certain commodity-linked structured notes would constitute qualifying income to the fund. In 2011, the IRS indicated that the granting of these types of private letter rulings was currently suspended, pending further internal review of the subject. In 2016, the IRS announced that it would not issue any such rulings in the future, and it revoked the previously issued rulings. If the Fund were to fail to qualify as a RIC and became subject to federal income tax, shareholders of the Fund would be subject to diminished returns. For more information, see “More Information About Taxes.”

Non-Principal Risks

Redemptions: The Fund may need to sell its holdings in order to meet shareholder redemption requests. The Fund could experience a loss when selling securities to meet redemption requests if the redemption requests are unusually large or frequent, occur in times of overall market turmoil or declining prices for the securities sold, or when the securities the Fund wishes to or is required to sell are illiquid. The Fund may be unable to sell illiquid investments at its desired time or price. Illiquidity can be caused by a drop in overall market trading volume, an inability to find a ready buyer, or legal restrictions on the securities' resale. Certain securities that were liquid when purchased may later become illiquid, particularly in times of overall economic distress.

Temporary Investments: The Fund may depart from its principal investment strategy in response to adverse market, economic, political or other conditions by taking temporary defensive positions (up to 100% of its assets) in cash, cash equivalents and short-term U.S. government securities. If the Fund were to take a temporary defensive position, it may be unable for a time to achieve its investment objective.

DISCLOSURE OF PORTFOLIO HOLDINGS

A description of the Company's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's SAI. The SAI is incorporated herein.

MORE INFORMATION ABOUT MANAGEMENT OF THE FUND

Investment Adviser

Campbell & Company Investment Adviser LLC ("Campbell" or "Adviser"), a Delaware corporation founded in January 2005, serves as the investment adviser to the Fund. The Adviser's principal place of business is located at 2850 Quarry Lake Drive, Suite 100, Baltimore, Maryland 21209. As of September 30, 2025, the Adviser together with its affiliates had approximately \$6.2 billion in assets under management. The Adviser is registered as an investment adviser with the SEC and as a Commodity Trading Advisor ("CTA") with the Commodity Futures Trading Commission ("CFTC") and is a member of the National Futures Association ("NFA").

The Adviser is a wholly-owned subsidiary of Campbell & Company, LP ("Campbell & Company"). Campbell & Company and its predecessor organization, Campbell & Company, Inc., were organized in 1972 and have over fifty years of experience in creating and managing alternative investment vehicles. The Adviser has appointed Campbell & Company as the Fund's Commodity Pool Operator ("CPO"). Campbell & Company is registered with the CFTC as a CPO and a CTA. Campbell & Company is a member of the NFA in such capacities.

The Fund compensates the Adviser for its services at the annual rate of 1.64% of its average annual net assets, payable on a monthly basis in arrears. The Adviser has contractually agreed to waive its advisory fee and/or reimburse expenses in order to limit Total Annual Fund Operating Expenses (excluding certain items discussed below) to 2.00%, 1.75%, and 2.75% of the Fund's average daily net assets for Class A Shares, Class I Shares, and Class C Shares, respectively. In determining the Adviser's obligation to waive advisory fees and/or reimburse expenses, the following expenses are not taken into account and could cause net Total Annual Fund Operating Expenses to exceed 2.00%, 1.75%, and 2.75%, as applicable: acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes. This contractual limitation is in effect until December 31, 2026, and may not be terminated without the approval of the Board of The RBB Fund, Inc. If at any time the Fund's Total Annual Fund Operating Expenses (not including acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes) for a year are less than 2.00%, 1.75%, and 2.75%, as applicable, the Adviser may recoup from the Fund any waived amount or other payments remitted by the Adviser within three years from the date on which such waiver or reimbursement was made, provided such reimbursement does not cause the Fund to exceed expense limitations that were in effect at the time of the waiver or reimbursement and the expense limitations that are current in effect. For the fiscal year ended August 31, 2025, after waivers, the Adviser received 1.55% of the Fund's average net assets in investment advisory fees from the Fund. Had fee waivers not been in place, the Adviser would have received 1.64% of the Fund's average net assets in investment advisory fees from the Fund.

A discussion regarding the basis for the Board's approval of the investment advisory agreement with the Adviser is available in the Fund's annual financial statements dated August 31, 2025.

The Campbell Systematic Macro Program is managed by Campbell's Investment Committee. The team, co-chaired by Dr. Kevin Cole and Dr. Grace Lo, is responsible for portfolio risk management, capital allocation and portfolio construction, and approves all changes to the portfolio, including new models and enhancements. John R. Radle, Campbell's Chief Operating Officer, is responsible for the management of the Funds' cash management program and serves alongside Dr. Cole and Dr. Lo as portfolio managers of the Fund.

Dr. Kevin Cole joined Campbell in October 2003 and has served as Chief Executive Officer and Chief Investment Officer since January 2022. Dr. Cole was appointed Chief Investment Officer in June 2017. Dr. Cole was appointed to Campbell's Board of Directors in January 2019, and serves as its Chair as of November 2024. Dr. Cole was appointed as Co-Chair of Campbell's Investment Committee in September 2017.

Dr. Grace Lo joined Campbell in February 2006 and currently serves as Chief Risk Officer. Dr. Lo leads Campbell's Risk and Portfolio team in Research and is also Co-Chair of the firm's Investment Committee. Dr. Lo was appointed to Campbell's Investment Committee in March 2010.

John R. Radle joined Campbell in June 2005 and currently serves as Chief Operating Officer. Mr. Radle served as Managing Director, Global Head of Trading from October 2012 to January 2022. He served as a member of Campbell's Investment Committee from April 2013 through December 2025. Mr. Radle was appointed Chief Operating Officer and to Campbell's Board of Directors in January 2022.

The SAI provides additional information about the compensation of, other accounts managed by, and ownership of shares of the Fund by Dr. Cole, Dr. Lo and Mr. Radle.

SHAREHOLDER INFORMATION

PRICING OF FUND SHARES

Class I Shares and Class C Shares of the Fund are sold at their NAV. Class A Shares of the Fund are sold at its NAV, plus a front-end sales charge, if applicable. The NAV of each Class of the Fund's shares is calculated as follows:

$$\text{NAV} = \frac{\text{Value of Assets Attributable to a Class} - \text{Value of Liabilities Attributable to the Same Class}}{\text{Number of Outstanding Shares of the Class}}$$

The Fund's NAV is calculated once daily at the close of regular trading hours on the NYSE (generally 4:00 p.m. Eastern time) on each day the NYSE is open. The NYSE is generally open Monday through Friday, except national holidays. The NYSE also may be closed on national days of mourning or due to natural disaster or other extraordinary events or emergency. Fund shares will generally not be priced on any day the NYSE is closed. The Fund will effect purchases of Fund Shares at the NAV (plus any applicable sales charges) next determined after receipt by the Transfer Agent of your purchase order in good order as described below. Due to the fact that different expenses are charged to the Class A Shares, Class I Shares, and Class C Shares of the Fund, the NAV of the three classes of the Fund will vary. The Fund will effect redemptions of Fund Shares at the NAV next calculated after receipt by the Transfer Agent of your redemption request in good order as described below. If the Fund holds securities that are primarily listed on non-U.S. exchanges, the NAV of the Fund's Shares may change on days when shareholders will not be able to purchase or redeem the Fund's Shares.

If available, the Fund's investments in securities and other exchange traded assets are generally valued based on market quotations. If market quotations are unavailable or deemed unreliable by the Fund's administrator, in consultation with the Adviser, securities will be valued by the Adviser in accordance with procedures adopted by the Board and under the Board's ultimate supervision. The Fund will regularly value its investments in derivative instruments at fair value. The Fund may use independent pricing services to assist in calculating the value of the Fund's portfolio holdings. Relying on prices supplied by pricing services or dealers or using fair valuation involves the risk that the values used by the Fund to price its investments may be higher or lower than the values used by other investment companies and investors to price the same investments.

Applicable federal tax requirements generally limit the degree to which the Fund may invest in the Subsidiary to an amount not exceeding 25% of its total assets. The Subsidiary prices its portfolio investments pursuant to the same pricing and valuation methodologies and procedures employed by the Fund. The Subsidiary offers to redeem all or a portion of its shares at the current NAV per share every day the Fund is open for business. The value of shares of the Subsidiary will fluctuate with the value of the Subsidiary's portfolio investments.

SALES CHARGES

Different Service Organizations may impose different sales charges and these variations are described in the Fund's Prospectus.

Class A Shares Sales Charges. Purchases of Class A Shares of the Fund are subject to a front-end sales charge of up to 3.50% of the total purchase price; however, sales charges may be reduced for large purchases as indicated below. Sales charges are not imposed on Shares that are purchased with reinvested dividends or other distributions. The table below indicates the front-end sales charge as a percentage of both the offering price and the net amount invested. The term "offering price" includes the front-end sales charge. Because of rounding in the calculation of the "offering price", the actual sales charge you pay may be more or less than that calculated using the percentages shown below.

<u>AMOUNT OF PURCHASE OF CLASS A SHARES</u>	<u>SALES CHARGE AS A % OF OFFERING PRICE</u>	<u>SALES CHARGE AS A % OF NET AMOUNT INVESTED</u>	<u>DEALER COMPENSATION AS A PERCENTAGE OF OFFERING PRICE</u>
Less than \$25,000	3.50%	3.63%	3.00%
At least \$25,000 but less than \$50,000	3.00%	3.09%	2.75%
At least \$50,000 but less than \$100,000	2.75%	2.83%	2.50%
At least \$100,000 but less than \$250,000	2.50%	2.56%	2.25%
At least \$250,000 but less than \$500,000	1.50%	1.52%	1.25%
At least \$500,000 but less than \$1,000,000	1.00%	1.01%	0.75%
\$1,000,000 or greater	0.00%	0.00%	0.00%

You may qualify for reduced sales charges or sales charge waivers. If you believe that you may qualify for a reduction or waiver of the sales charge, you should discuss this matter with your broker or other financial intermediary. To qualify for these reductions or waivers, you or your financial intermediary must provide sufficient information at the time of purchase to verify that your purchase qualifies for such treatment. This information could be used to aggregate, for example, holdings in retirement accounts, Fund shares owned by your immediate family members, and holdings in accounts at other brokers or financial intermediaries. In addition to breakpoint discounts, the following sections describe other circumstances in which sales charges are waived or otherwise may be reduced. See "Reduced Sales Charge – Class A Shares" below.

Rights of Accumulation. You may combine your new purchase of Class A Shares with Class A Shares and/or Class C Shares currently owned for the purpose of qualifying for the lower initial sales charge rates that apply to larger purchases. The applicable sales charge for the new purchase is based on the total of your current purchase and the current NAV of all other shares you own. You may combine your account, your spouse's account, and the account(s) of your children under age 25.

This privilege is also extended to certain employee benefit plans and trust estates. The following purchases may be combined for purposes of determining the "Amount of Purchase:" (a) individual purchases, if made at the same time, by a single purchaser, the purchaser's spouse and children under the age of 25 purchasing Class A Shares for their own accounts, including shares purchased by a qualified retirement plan(s) exclusively for the benefit of such individual(s) (such as an IRA, individual-type section 403(b) plan or single-participant Keogh-type plan) or by a "Company," as defined in Section 2(a)(8) of the 1940 Act, solely controlled as defined in the 1940 Act, by such individual(s), or (b) individual purchases by trustees or other fiduciaries purchasing Class A Shares (i) for a single trust estate or a single fiduciary account, including an employee benefit plan, or (ii) concurrently by two or more employee benefit plans for a single employer or of employers affiliated with each other in accordance with Section 2(a)(3)(c) of the 1940 Act (excluding in either case an employee benefit plan described in (a) above), provided such trustees or other fiduciaries purchase shares in a single payment. Purchases made for nominee or street name accounts may not be combined

with purchases made for such other accounts. You may also further discuss the combined purchase privilege with your investment broker, brokerage firm, financial institution, or other industry professional, including affiliates of the Adviser.

You will need to provide written instruction with respect to the other accounts whose purchases should be considered in Rights of Accumulation.

Rights of Accumulation do not apply to Class I Shares or Class C Shares.

Letter of Intent. If you anticipate purchasing a specific dollar amount of Class A Shares within a 13-month period, the shares may be purchased at a reduced sales charge by completing and returning a Letter of Intent (the "Letter"), which can be provided to you by your investment broker or other Service Organization. The reduced sales charge may also be obtained on Class A Shares purchased within the 90 days prior to the date of receipt of the Letter. Shares purchased under the Letter are eligible for the same reduced sales charge that would have been available had all the shares been purchased at the same time. There is no obligation to purchase the full amount of shares indicated in the Letter. Should you invest more or less than indicated in the Letter during the 13-month period, the sales charge will be recalculated based on the actual amount purchased. A portion of the amount of the intended purchase normally will be held in escrow in the form of Shares pending completion of the intended purchase. If you do not purchase the full amount of Class A Shares indicated in the Letter, the appropriate amount of shares held in escrow will be redeemed by the Transfer Agent to pay the sales charge that was not applied to your purchase.

Letters of Intent do not apply to Class I Shares or Class C Shares.

Class A Shares Sales Charge Waivers.

The sales charge on purchases of Class A Shares is waived for certain types of investors, including:

- Current and retired directors and officers of funds sponsored by the Adviser or any of its subsidiaries, their families (*e.g.*, spouse, children, mother or father) and any purchases referred through the Adviser.
- Employees of the Adviser and their families, or any full-time employee or registered representative of the Distributor or of broker-dealers having selling agreements with the Distributor (a "Selling Broker") and their immediate families (or any trust, pension, profit sharing or other benefit plan for the benefit of such persons).
- Any full-time employee of a bank, savings and loan, credit union or other financial institution that utilizes a Selling Broker to clear purchases of the Fund's shares and their immediate families.
- Participants in certain "wrap-fee" or asset allocation programs or other fee-based arrangements sponsored by broker-dealers and other financial institutions that have entered into agreements with the Distributor.
- Clients of financial intermediaries that have entered into arrangements with the Distributor providing for the shares to be used in particular investment products made available to such clients and for which such registered investment advisors may charge a separate fee.
- Institutional investors (which may include bank trust departments and registered investment advisers).
- Any accounts established on behalf of registered investment advisers or their clients by broker dealers that charge a transaction fee and that have entered into agreements with the Distributor.
- Separate accounts used to fund certain unregistered variable annuity contracts or Section 403(b) or 401(a) or (k) accounts.
- Whether a sales charge waiver is available for your retirement plan or charitable account depends upon the policies and procedures of your Service Organization and if your Service Organization has entered into an agreement with the Company or the Distributor. Please consult your financial adviser for further information.

In order to take advantage of a sales charge waiver, a purchaser must certify to the Service Organization eligibility for a waiver and must notify the Service Organization whenever eligibility for a waiver ceases to exist. A Service Organization reserves the right to request additional information from a purchaser in order to verify that such purchaser is so eligible. Such information may include account statements or other records regarding Shares of the Fund held by you or your immediate family household members.

Contingent Deferred Sales Charge on Certain Redemptions – Class I Shares. Contingent Deferred Sales Charges do not apply to redemptions of Class I Shares.

Contingent Deferred Sales Charge on Certain Redemptions – Class C Shares. No sales load is payable by a shareholder at the time of purchase, although the Distributor advances applicable Service Organizations the first year distribution and services fee at a rate of 1.00% on investments in the Fund's Class C Shares. This advancement is solely financed by the Adviser and not by investors or the Fund. As a result, the Fund imposes a CDSC of 1.00% on redemptions of investments made within 12 months of purchase. The financing party receives the CDSC from the Distributor as reimbursement for the up-front sales commission that has been financed. The CDSC is assessed on an amount equal to the lesser of the offering price at the time of purchase of the shares redeemed and the NAV of shares redeemed at the time of redemption. When Class C Shares are redeemed, the redemption order is processed so that the lowest deferred sales charge is charged, and Class C Shares that are not subject to the deferred sales charge are redeemed first. Any CDSC paid on the redemptions of Class C Shares expressed as a percentage of the applicable redemption amount may be higher or lower than the charge described due to rounding. No CDSC is imposed on increases in NAV for Fund shares acquired as reinvested Fund distributions.

The CDSC will be waived for Class C Shares in the following circumstances:

- Redemptions of shares purchased through certain employer-sponsored retirement plans and rollovers of current investments in the Fund through such plans;
- Exchanges pursuant to the exchange privilege, as described in "Shareholder Information – Exchange Privilege";
- Redemptions made in connection with minimum required distributions from IRA or 403(b)(7) accounts due to the shareholder reaching the required minimum distribution age ;
- Certain post-retirement withdrawals from an IRA or other retirement plan if you are over 59 1/2 years old and you purchased your shares prior to October 2, 2006;
- Redemptions made with respect to certain retirement plans sponsored by the Fund;
- Redemptions resulting from shareholder death as long as the waiver request is made within one year of death or, if later, reasonably promptly following completion of probate (including in connection with the distribution of account assets to a beneficiary of the decedent);
- Withdrawals resulting from shareholder disability (as defined in the Internal Revenue Code) as long as the disability arose subsequent to the purchase of the shares;
- Involuntary redemptions made of shares in accounts with low balances;
- Redemptions related to the payment of custodial IRA fees, if any; and
- Redemptions when a shareholder can demonstrate hardship, in the absolute discretion of the Fund.

Repurchase of Class A Shares. Reinstatement of Class A Shares at NAV within 90 calendar days of redemption will be achieved manually. Shareholders must provide instruction at the time of purchase of their intent to exercise this privilege. In effect, this allows you to reacquire shares that you may have had to redeem, without repaying the front-end sales charge. To exercise this privilege, the Fund must receive your purchase order within 90 days of your redemption. In addition, you must notify the Fund when you send in your purchase order that you are repurchasing shares. Certain tax rules may limit your ability to recognize a loss on the redemption of your Class A Shares, and you should consult your tax advisor if recognizing such a loss is important to you.

Reduced Sales Charge – Class A Shares. In addition to the above-described reductions in initial sales charges for purchases over a certain dollar size, you may also be eligible to participate in one or more of the programs described below to lower your initial sales charge. To be eligible to participate in these programs, you must inform your broker-dealer or financial advisor at the time you purchase shares that you would like to participate in one or more of the programs and provide information necessary to determine your eligibility to participate, including the account number(s) and names in which your accounts are registered at the time of purchase. In addition, the Fund or its agent may request account statements if it is unable to verify your account information.

Combined Purchase/Quantity Discount Privilege. When calculating the appropriate sales charge rate, the Fund will, upon written notification at the time of purchase, combine same-day purchases of Class A Shares (that are subject to a sales charge) made by you, your spouse and your minor children (under age 21). This combination also applies to Class A Shares you purchase with a Letter of Intent.

Purchasers Qualifying for Reductions in Initial Sales Charges. Only certain persons or groups are eligible for the reductions in initial sales charges described in the preceding section. These qualified purchasers include the following:

Individuals

- an individual, his or her spouse, or children residing in the same household;
- any trust established exclusively for the benefit of an individual;

Trustees and Fiduciaries

- a trustee or fiduciary purchasing for a single trust, estate or fiduciary account; and

Other Groups

- any organized group of persons, whether or not incorporated, purchasing Fund shares, provided that (i) the organization has been in existence for at least six months; and (ii) the organization has some purpose other than the purchase at a discount of redeemable securities of a registered investment company.

Investors or dealers seeking to qualify orders for a reduced initial sales charge must identify such orders at the time of purchase and, if necessary, support their qualification for the reduced charge with appropriate documentation. Appropriate documentation includes, without limitation, account statements regarding Shares of the Fund held in all accounts (e.g., retirement accounts) by the investor, and, if applicable, his or her spouse and children residing in the same household, including accounts at broker-dealers or other financial intermediaries different than the broker-dealer of record for the current purchase of Fund's Shares. The Distributor reserves the right to determine whether any purchaser is entitled, by virtue of the foregoing, to the reduced initial sales charge. No person or entity may distribute shares of the Fund without payment of the applicable sales charge other than to persons or entities who qualify for a reduction in the sales charge as provided herein.

The Fund does not provide additional information on reduced sales charges on its website because the information is contained in its Prospectus, which will be available on the Fund's website at www.campbell.com.

PURCHASE OF FUND SHARES

Shares representing interests in the Fund are offered continuously for sale by Quasar Distributors, LLC, a wholly owned subsidiary of Foreside Financial Group, LLC (d/b/a ACA Group) (the "Distributor").

General. You may purchase Shares of the Fund at the NAV per Share (plus any applicable sales charges) next calculated after your order is received by the Transfer Agent in good order as described below. The Fund's NAV is calculated once daily at the close of regular trading hours on the NYSE (generally 4:00 p.m. Eastern time) on each day the NYSE is open. After an initial purchase is made, the Transfer Agent will set up an account for you on the Company records. The minimum initial investment in the Fund is \$10,000 for Class I Shares. The minimum initial investment for Class A Shares and Class C Shares is \$2,500. The minimum amount for subsequent investments is \$500 for Class A Shares. There is no minimum amount for subsequent investments for Class I Shares and Class C Shares. The Fund may accept initial investments of smaller amounts in its sole discretion. You can only purchase Shares of the Fund on days the NYSE is open and through the means described below.

Purchases Through Intermediaries. Shares of the Fund may also be available through certain Service Organizations. Certain features of the Shares, such as the initial and subsequent investment minimums and certain trading restrictions, may be modified or waived by Service Organizations. Service Organizations may impose minimum investment requirements. Service Organizations may also impose transaction or administrative charges or other direct fees, which charges and fees would not be imposed if Shares are purchased directly from the Company. Therefore, you should contact the Service Organization acting on your behalf concerning the fees (if any) charged in connection with a purchase or redemption of Shares and should read this Prospectus in light of the terms governing your accounts with the Service Organization. Service Organizations will be responsible for promptly transmitting client or customer purchase and redemption orders to the Company in accordance with their agreements with the Company or its agent and with clients or customers. Service Organizations or, if applicable, their designees that have entered into agreements with the

Company or its agent may enter confirmed purchase orders on behalf of clients and customers, with payment to follow no later than the Company's pricing on the following business day. If payment is not received by such time, the Service Organization could be held liable for resulting fees or losses. The Company will be deemed to have received a purchase or redemption order when a Service Organization, or, if applicable, its authorized designee, accepts a purchase or redemption order in good order if the order is actually received by the Company in good order not later than the next business morning. If a purchase order is not received by the Fund in good order, the Transfer Agent will contact the financial intermediary to determine the status of the purchase order. Orders received by the Company in good order will be priced at the Fund's NAV (plus any applicable sales charges) next computed after such orders are deemed to have been received by the Service Organization or its authorized designee.

For administration, subaccounting, transfer agency and/or other services, the Adviser, the Distributor or their affiliates may pay Service Organizations and certain recordkeeping organizations a fee (the "Service Fee") based on the average annual NAV of accounts with the Company maintained by such Service Organizations or recordkeepers. The Service Fee payable to any one Service Organization is determined based upon a number of factors, including the nature and quality of services provided, the operations processing requirements of the relationship and the standardized fee schedule of the Service Organization or recordkeeper.

In addition, the Fund may enter into agreements with Service Organizations pursuant to which the Fund will pay a Service Organization for networking, sub-transfer agency, sub-administration and/or sub-accounting services. These payments are generally based on either (1) a percentage of the average daily net assets of Fund shareholders serviced by the Service Organization or (2) a fixed dollar amount for each account serviced by the Service Organization. The aggregate amount of these payments may be substantial.

Initial Investment By Mail. Subject to acceptance by the Fund, an account may be opened by completing and signing an account application and mailing it to the Fund at the address noted below, together with a check payable to the Fund. All checks must be in U.S. Dollars drawn on a domestic bank. The Fund will not accept payment in cash or money orders. The Fund does not accept post-dated checks or any conditional order or payment. To prevent check fraud, the Fund will not accept third party checks, Treasury checks, credit card checks, traveler's checks or starter checks for the purchase of shares.

Regular Mail:

Campbell Systematic Macro Fund
c/o U.S. Bank Global Fund Services
P.O. Box 219252
Kansas City, MO 64121-9252

Overnight Mail:

Campbell Systematic Macro Fund
c/o U.S. Bank Global Fund Services
801 Pennsylvania Avenue 219252
Kansas City, MO 64105-1307

The Fund does not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption requests does not constitute receipt by the Transfer Agent of the Fund. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices.

Shares will be purchased at the NAV next computed after the time the application and funds are received in proper order and accepted by the Fund. The Transfer Agent will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any payment that is returned. It is the policy of the Fund not to accept applications under certain circumstances or in amounts considered disadvantageous to shareholders. The Fund reserves the right to reject any application.

Initial Investment By Wire. If you are making your first investment in the Fund, before you wire funds, the Transfer Agent must have a completed account application. You may mail or overnight deliver your account application to the Transfer Agent. Upon receipt of your completed account application, the Transfer Agent will establish an account for you. The account number assigned will be required as part of the instruction that should be provided to your bank to send the wire. Your bank must include both the name of the Fund you are purchasing, the account number, and your name so that monies can be correctly applied. Your bank should transmit funds by wire to:

Wire Instructions:

U.S. Bank National Association
777 East Wisconsin Ave
Milwaukee WI 53202
ABA 075000022

Credit:

U.S. Bancorp Fund Services
Account #112-952-137

For Further Credit to:

Campbell Systematic Macro Fund
(shareholder registration)
(shareholder account number)

Wired funds must be received prior to 4:00 p.m. Eastern time to be eligible for same day pricing. The Fund and U.S. Bank, N.A. are not responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions.

Subsequent Investments – By Wire. Before sending your wire, please contact the Transfer Agent to advise them of your intent to wire funds. This will ensure prompt and accurate credit upon receipt of your wire.

Telephone Purchase. Investors may purchase additional shares of the Fund by calling 1-844-261-6488. If you did not decline this option on your account application, and your account has been open for at least 7 business days, telephone orders will be accepted via electronic funds transfer from your bank account through the Automated Clearing House (ACH) network. You must have banking information established on your account prior to making a purchase. If your order is received prior to 4 p.m. Eastern time, your shares will be purchased at the net asset value calculated on the day your order is placed.

Telephone trades must be received by or prior to market close. During periods of high market activity, shareholders may encounter higher than usual call waits. Please allow sufficient time to place your telephone transaction.

Additional Investments. Additional investments may be made at any time by purchasing Shares at the NAV per Share of the Fund by mailing a check to the Transfer Agent at the address noted above under “Initial Investment by Mail” or by wiring as outlined above under “Initial Investment by Wire.” Initial and additional purchases made by check or electronic funds transfer through the ACH network cannot be redeemed until payment of the purchase has been collected. This may take up to 15 calendar days from the purchase date. The minimum amount for subsequent investments is \$500 for Class A Shares. There is no minimum amount for subsequent investments for Class I Shares or Class C Shares.

Retirement Plans/Individual Retirement Accounts (“IRAs”) The Fund offers prototype documents for a variety of retirement accounts for individuals and small businesses. Please call 1-844-261-6488 for information on:

- Individual Retirement Plan, including Traditional IRAs and Roth IRAs
- Small Business Retirement Plans, including Simple IRAs and SEP IRAs
- Coverdell Education Savings Accounts

There may be special distribution requirements for a retirement account, such as required distributions or mandatory federal income tax withholding. For more information, call the number listed above. You may be charged a \$15 annual account maintenance fee for each retirement account up to a maximum of \$30 annually and a \$25 fee for transferring assets to another custodian or for closing a retirement account.

Purchases in Kind. In certain circumstances, Shares of the Fund may be purchased “in kind” (*i.e.*, in exchange for securities, rather than cash). The securities rendered in connection with an in-kind purchase must be liquid securities that are not restricted as to transfer and have a value that is readily ascertainable in accordance with the Company’s

valuation procedures. Securities accepted by the Fund will be valued, as set forth in this Prospectus, as of the time of the next determination of NAV after such acceptance. The Shares of the Fund that are issued to the investor in exchange for the securities will be determined as of the same time. All dividend, subscription, or other rights that are reflected in the market price of accepted securities at the time of valuation become the property of the Fund and must be delivered to the Fund by the investor upon receipt from the issuer. The Fund will not accept securities in exchange for its Shares unless such securities are, at the time of the exchange, eligible to be held by the Fund and satisfy such other conditions as may be imposed by the Adviser or the Company. Purchases in-kind may result in the recognition of gain or loss for federal income tax purposes on the securities transferred to the Fund.

Other Purchase Information. The Company reserves the right, in its sole discretion, to suspend the offering of Shares or to reject purchase orders when, in the judgment of management, such suspension or rejection is in the best interests of the Fund. The Adviser will monitor the Fund's total assets and may, subject to Board's approval, decide to close the Fund at any time to new investments or to new accounts due to concerns that a significant increase in the size of the Fund may adversely affect the implementation of the Fund's strategy. The Adviser, subject to Board's approval, may also choose to reopen the Fund to new investments at any time, and may subsequently close the Fund again should concerns regarding the Fund's size recur. If the Fund closes to new investments, the Fund may be offered only to certain existing shareholders of the Fund and certain other persons who may be subject to cumulative, maximum purchase amounts, as follows:

- a. persons who already hold Shares of the closed Fund directly or through accounts maintained by brokers by arrangement with the Adviser;
- b. existing and future clients of financial advisers and planners whose clients already hold Shares of the Fund;
- c. employees of the Adviser and their spouses, parents and children; and
- d. directors of the Company.

Distributions to all shareholders of the closed Fund will continue to be reinvested unless a shareholder elects otherwise. The Adviser, subject to the Board's discretion, reserves the right to implement other purchase limitations at the time of closing, including limitations on current shareholders.

Purchases of the Fund's Shares will be made in full and fractional Shares of the Fund calculated to three decimal places. Certificates for Shares will not be issued.

Shares may be purchased and subsequent investments may be made by principals and employees of the Adviser and their family members, either directly or through their IRAs, and by any pension and profit-sharing plan of the Adviser, without being subject to the minimum investment limitation. The Adviser is authorized to waive the minimum initial investment requirement.

Good Order. A purchase request is considered to be in good order when the purchase request includes the name of the Fund, the dollar amount of shares to be purchased, your account application or investment stub, and a check payable to the Fund. Purchase requests not in good order may be rejected.

Customer Identification Program. Federal law requires the Company to obtain, verify and record identifying information, which may include the name, residential or business street address, date of birth (for an individual), social security or taxpayer identification number or other identifying information for each investor who opens or reopens an account with the Company. If you are opening the account in the name of a legal entity (e.g., partnership, limited liability company, business trust, corporation, etc.), you must also supply the identity of the beneficial owners. Mailing addresses containing only a P.O. Box will not be accepted. Applications without the required information, or without any indication that a social security or taxpayer identification number has been applied for, may not be accepted. After acceptance, to the extent permitted by applicable law or its customer identification program, the Company reserves the right (a) to place limits on transactions in any account until the identity of the investor is verified; or (b) to refuse an investment in a Company portfolio or to involuntarily redeem an investor's shares and close an account in the event that an investor's identity is not verified. The Company and its agents will not be responsible for any loss in an investor's account resulting from the investor's delay in providing all required identifying information or from closing an account and redeeming an investor's Shares when an investor's identity cannot be verified.

REDEMPTION OF FUND SHARES

You may redeem Fund Shares at the next NAV calculated after a redemption request is received by the Transfer Agent in good order. The Fund's NAV is calculated once daily at the close of regular trading hours on the NYSE (generally 4:00 p.m. Eastern time) on each day the NYSE is open. You can redeem Shares of the Fund only on days the NYSE is open and through the means described below. You may redeem Fund Shares by mail, or, if you are authorized, by telephone. The value of Shares redeemed may be more or less than the purchase price, depending on the market value of the investment securities held by the Fund.

Redemption By Mail. Your redemption request should be sent to: Campbell Systematic Macro Fund, c/o U.S. Bank Global Fund Services, P.O. Box 219252, Kansas City, MO 64121-9252. If sent by overnight mail to: Campbell Systematic Macro Fund, c/o U.S. Bank Global Fund Services, 801 Pennsylvania Avenue 219252, Kansas City, MO 64105-1307.

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption requests does not constitute receipt by the Transfer Agent of the Fund. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices.

A signature guarantee, from either a Medallion program member or a non-Medallion program member, is required in the following situations:

- If ownership is being changed on your account;
- When redemption proceeds are payable or sent to any person, address or bank account not on record;
- When a redemption is received by the Transfer Agent and the account address has changed within the last 15 calendar days;
- For all redemptions in excess of \$100,000 from any shareholder account.

The Fund may waive any of the above requirements in certain instances. In addition to the situations described above, the Fund and/or the Transfer Agent reserve the right to require a signature guarantee in other instances based on the circumstances relative to the particular situation.

Nonfinancial transactions, including establishing or modifying certain services on an account, may require a signature guarantee, signature verification from a Signature Validation Program member, or other acceptable form of authentication from a financial institution source.

Signature guarantees will generally be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program and the Securities Transfer Agents Medallion Program ("STAMP"). A notary public is not an acceptable signature guarantor.

Redemption By Telephone. If you did not decline telephone options on your account application (or requested by subsequent arrangements in writing), and your account has been open for at least 15 days, you may initiate a redemption in any amount up to \$100,000 by calling the Transfer Agent at 1-844-261-6488.

Investors may have a check sent to the address of record, proceeds may be wired to a shareholder's bank account of record, or funds may be sent via electronic funds transfer through the Automated Clearing House (ACH) network, also to the bank account of record. Wires are subject to a \$15 fee paid by the investor, but the investor does not incur any charge when proceeds are sent via the ACH system.

Once a telephone transaction has been placed, it cannot be canceled or modified after the close of regular trading on the NYSE (generally, 4:00 p.m., Eastern time).

Telephone trades must be received by or prior to market close. During periods of high market activity, shareholders may encounter higher than usual call waits. Please allow sufficient time to place your telephone transaction.

Before executing an instruction received by telephone, the Transfer Agent will use reasonable procedures to confirm that the telephone instructions are genuine. The telephone call may be recorded, and the caller may be asked to verify certain personal identification information. If the Fund or its agents follow these procedures, they cannot be held liable for any loss, expense or cost arising out of any telephone redemption request that is reasonably believed to be genuine. This includes fraudulent or unauthorized requests. If an account has more than one owner or authorized person, the Fund will accept telephone instructions from any one owner or authorized person.

IRA and Other Retirement Plan Redemptions. If you have an IRA, you must indicate on your written redemption request whether or not to withhold federal income tax. Redemption requests failing to indicate an election to have tax withheld will be subject to 10% withholding.

Shares held in IRA accounts may be redeemed by telephone at 1-844-261-6488. Investors will be asked whether or not to withhold taxes from any distribution.

Involuntary Redemption. The Fund reserves the right to redeem a shareholder's account in the Fund at any time the value of the account falls below \$500 as a result of a redemption or an exchange request. Shareholders will be notified in writing that the value of their account in the Fund is less than \$500 and will be allowed 30 days to make additional investments before the redemption is processed. The Fund may assert the right to redeem your Shares at current NAV at any time and without prior notice if, and to the extent that, such redemption is necessary to reimburse the Fund for any loss sustained by reason of your failure to make full payment for Shares of the Fund you previously purchased or subscribed for.

Other Redemption Information. Redemption proceeds for Shares of the Fund recently purchased by check or electronic funds transfer through the ACH network may not be distributed until payment for the purchase has been collected, which may take up to fifteen calendar days from the purchase date. Shareholders can avoid this delay by utilizing the wire purchase option. Other than as described above, payment of the redemption proceeds will be made within seven days after receipt of an order for a redemption. The Company may suspend the right of redemption or postpone the date at times when the NYSE is closed or under any emergency circumstances as determined by the SEC. The Fund typically expects to meet redemption requests by paying out proceeds from cash or cash equivalent portfolio holdings, or by selling portfolio securities. In stressed market conditions, redemption methods may include redeeming in kind.

If the Board determines that it would be detrimental to the best interests of the remaining shareholders of the Fund to make payment wholly or partly in cash, redemption proceeds may be paid in whole or in part by an in-kind distribution of readily marketable securities held by the Fund instead of cash in conformity with applicable rules of the SEC and the Company's Policy and Procedures Related to the Processing of In-Kind Redemptions. Investors generally will incur brokerage charges on the sale of portfolio securities so received in the payment of redemptions. If a shareholder receives redemption proceeds in-kind, the shareholder will bear the market risk of the securities received until their disposition and should expect to incur transaction costs upon the disposition of the securities. The Company has elected, however, to be governed by Rule 18f-1 under the 1940 Act, so that the Fund is obligated to redeem its Shares solely in cash up to the lesser of \$250,000 or 1% of its NAV during any 90-day period for any one shareholder of the Fund.

Good Order. A redemption request is considered to be in good order when the redemption request includes the name of the Fund, the number of shares or dollar amount to be redeemed, the account number, and signatures by all of the shareholders whose names appear on the account registration with a signature guarantee, if applicable. Redemption requests not in good order may be delayed.

MARKET TIMING

In accordance with the policy adopted by the Board, the Company discourages and does not accommodate market timing and other excessive trading practices. Purchases should be made with a view to longer-term investment only. Excessive short-term (market timing) trading practices may disrupt portfolio management strategies, increase brokerage and administrative costs, harm Fund performance and result in dilution in the value of Fund Shares held by long-term shareholders. The Company and the Adviser reserve the right to (i) reject a purchase or exchange order, (ii) delay payment of immediate cash redemption proceeds for up to seven calendar days, (iii) revoke a shareholder's privilege to purchase Fund Shares (including exchanges), or (iv) limit the amount of any exchange involving the purchase of Fund Shares. An investor may receive notice that their purchase order or exchange has been rejected after the day the order is placed or after acceptance by a financial intermediary. It is currently expected that a shareholder would receive notice that its purchase order or exchange has been rejected within 48 hours after such purchase order or exchange has been received by the Company in good order. The Company and the Adviser will not be liable for any loss resulting from rejected purchase orders. To minimize harm to the Company and its shareholders (or the Adviser), the Company (or the Adviser) will exercise its right if, in the Company's (or the Adviser's) judgment, an investor has a history of excessive trading or if an investor's trading, in the judgment of the Company (or the Adviser), has been or may be disruptive to the Fund. No waivers of the provisions of the policy established to detect and deter market timing and other excessive trading activity are permitted that would harm the Fund and its shareholders or would subordinate the interests of the Fund and its shareholders to those of the Adviser or any affiliated person or associated person of the Adviser.

Pursuant to the policy adopted by the Board, the Adviser has developed criteria that it uses to identify trading activity that may be excessive. The Adviser reviews on a regular, periodic basis available information related to the trading activity in the Fund in order to assess the likelihood that the Fund may be the target of excessive trading. As part of its excessive trading surveillance process, the Adviser, on a periodic basis, examines transactions that exceed certain monetary thresholds or numerical limits within a period of time. If, in its judgment, the Adviser detects excessive, short-term trading, it may reject or restrict a purchase request and may further seek to close an investor's account with the Fund. The Adviser may modify its surveillance procedures and criteria from time to time without prior notice regarding the detection of excessive trading or to address specific circumstances. The Adviser will apply the criteria in a manner that, in its judgment, will be uniform.

There is no assurance that the Fund will be able to identify market timers, particularly if they are investing through intermediaries.

If necessary, the Company may prohibit additional purchases of Shares by a financial intermediary or by certain customers of the financial intermediary. Financial intermediaries may also monitor their customers' trading activities in the Fund. The criteria used by intermediaries to monitor for excessive trading may differ from the criteria used by the Company. If a financial intermediary fails to enforce the Company's excessive trading policies, the Company may take certain actions, including terminating the relationship.

EXCHANGE PRIVILEGE

Beneficial holders with financial intermediary sponsored fee-based programs are eligible to exchange their Shares in a particular share class of the Fund for Shares in a different share class of the Fund if the shareholder meets the eligibility requirements for that class of Shares or the shareholder is otherwise eligible to purchase that class of Shares. You may only exchange between identically registered accounts. Such an exchange will be effected at the NAV of the Shares next calculated after the exchange request is received by the Transfer Agent in good order. Shares of each class of the Fund represent equal pro rata interests in the Fund and accrue dividends and calculate NAV and performance quotations in the same manner. The performance of each class is quoted separately due to different actual expenses. Total return can be expected to differ among classes of the Fund. Shareholders who exercise the exchange privilege will generally not recognize a taxable gain or loss for federal income tax purposes. The Fund reserves the right, at its sole discretion, to change or discontinue the exchange privilege, or to temporarily suspend the privilege during unusual market conditions when, in the judgment of management, such change or discontinuance is in the best interests of the Fund.

DIVIDENDS AND DISTRIBUTIONS

The Fund will distribute substantially all of its net investment income and net realized capital gains, if any, to its shareholders. All distributions are reinvested in the form of additional full and fractional Shares of the Fund unless a shareholder elects otherwise. The Fund will declare and pay dividends from net investment income annually. Net realized capital gains (including net short-term capital gains), if any, will be distributed by the Fund at least annually.

The Fund may pay additional distributions and dividends at other times if necessary for the Fund to avoid U.S. federal tax. The Fund's distributions and dividends, whether received in cash or reinvestment in additional Shares, are subject to U.S. federal tax.

All distributions will be reinvested in additional Fund shares unless you elect to receive cash via one of the following options: (1) receive distributions of net capital gain in cash, while reinvesting net investment income distributions in additional Fund shares; (2) receive all distributions in cash; or (3) reinvest net capital gains distributions in additional Fund shares, while receiving distributions of net investment income in cash.

If you elect to receive distributions and/or capital gains paid in cash, and the U.S. Postal Service cannot deliver the check, or if a check remains outstanding for six months, the Fund reserves the right to reinvest the distribution check in your account, at the Fund's current NAV, and to reinvest all subsequent distributions.

You may change the distribution option on your account at any time. You should notify the Transfer Agent in writing or by telephone at least five (5) days prior to the next distribution.

MORE INFORMATION ABOUT TAXES

The following is a summary of certain U.S. tax considerations relevant under current law, which may be subject to change in the future. Except where otherwise indicated, the discussion relates to investors who are individual U.S. citizens or residents. You should consult your tax adviser for further information regarding federal, state, local and/or foreign tax consequences relevant to your specific situation.

Distributions. The Fund contemplates distributing as dividends each year all or substantially all of its taxable income, including its net capital gain (the excess of net long-term capital gain over net short-term capital loss). Except as otherwise discussed below, you will be subject to federal income tax on Fund distributions regardless of whether they are paid in cash or reinvested in additional shares. Fund distributions attributable to short-term capital gains and net investment income, including all distributions attributable to income of the Subsidiary, will generally be taxable to you as ordinary income, except as discussed below.

Distributions attributable to the net capital gain of the Fund will be taxable to you as long-term capital gain, no matter how long you have owned your Fund shares. The maximum federal long-term capital gain rate applicable to individuals, estates, and trusts is currently 23.8% (which includes a 3.8% Medicare tax). You will be notified annually of the tax status of distributions to you.

Distributions from the Fund will generally be taxable to you in the taxable year in which they are paid, with one exception. Distributions declared by the Fund in October, November or December and paid in January of the following year are taxed as though they were paid on December 31st.

A portion of distributions paid by the Fund to shareholders that are corporations may also qualify for the dividends-received deduction for corporations, subject to certain holding period requirements and debt financing limitations. The amount of the dividends qualifying for this deduction may, however, be reduced as the result of the Fund's securities lending activities (if any), by a high portfolio turnover rate or by investments in debt securities or foreign corporations.

The Fund may be subject to foreign withholding or other foreign taxes on income or gain from certain foreign securities. If more than 50% of the value of the total assets of the Fund consists of stocks and securities (including debt securities) of foreign corporations at the close of a taxable year, the Fund may elect, for federal income tax purposes, to treat certain foreign taxes paid by it, including generally any withholding and other foreign income taxes, as paid by its shareholders. If the Fund makes this election, the amount of those foreign taxes paid by the Fund will be included in its shareholders' income pro rata (in addition to taxable distributions actually received by them), and each such shareholder will be entitled either (1) to credit that proportionate amount of taxes against U.S. federal income tax liability as a foreign tax credit or (2) to take that amount as an itemized deduction. If the Fund is not eligible or chooses not to make this election the Fund will be entitled to deduct any such foreign taxes in computing the amounts it is required to distribute.

If you purchase shares just before a distribution, the purchase price will reflect the amount of the upcoming distribution, but you will be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of capital. This adverse tax result is known as "buying into a dividend."

Sales of Shares. You will generally recognize taxable gain or loss for federal income tax purposes on a sale or redemption of your shares based on the difference between your tax basis in the shares and the amount you receive for them. Generally, you will recognize long-term capital gain or loss if you have held your Fund shares for over twelve months at the time you dispose of them.

Any loss realized on shares held for six months or less will be treated as a long-term capital loss to the extent of any capital gain dividends that were received on the shares. Additionally, any loss realized on a disposition of shares of the Fund may be disallowed under "wash sale" rules to the extent the shares disposed of are replaced with other shares of the Fund within a period of 61 days beginning 30 days before and ending 30 days after the shares are disposed of, such as pursuant to a dividend reinvestment in shares of the Fund. If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares acquired.

The Fund (or relevant broker or financial adviser) is required to compute and report to the IRS and furnish to Fund shareholders cost basis information when such shares are sold. The Fund has elected to use the average cost method, unless you instruct the Fund to use a different IRS-accepted cost basis method, or choose to specifically identify your shares at the time of each sale. If your account is held by your broker or other financial adviser, they may select a different cost basis method. In these cases, please contact your broker or other financial adviser to obtain information with respect to the available methods and elections for your account. You should carefully review the cost basis information

provided by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on your federal and state income tax returns. Fund shareholders should consult with their tax advisers to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how the cost basis reporting requirements apply to them.

IRAs and Other Tax-Qualified Plans. The one major exception to the preceding tax principles is that distributions on, and sales and redemptions of, shares held in an IRA (or other tax-qualified plan) will not be currently taxable unless such shares were acquired with borrowed funds.

Backup Withholding. The Fund may be required in certain cases to withhold and remit to the IRS a percentage of taxable dividends or gross proceeds realized upon sale payable to shareholders who have failed to provide a correct tax identification number in the manner required, or who are subject to withholding by the IRS for failure to properly include on their return payments of taxable interest or dividends, or who have failed to certify to the Fund that they are not subject to backup withholding when required to do so or that they are “exempt recipients.” The current backup withholding rate is 24%.

U.S. Tax Treatment of Foreign Shareholders. Generally, nonresident aliens, foreign corporations and other foreign investors are subject to a 30% withholding tax on dividends paid by a U.S. corporation, although the rate may be reduced for an investor that is a qualified resident of a foreign country with an applicable tax treaty with the United States. In the case of a regulated investment company such as the Fund, however, certain categories of dividends are exempt from the 30% withholding tax. These generally include dividends attributable to the Fund’s net capital gains (the excess of net long-term capital gains over net short-term capital losses), dividends attributable to the Fund’s interest income from U.S. obligors and dividends attributable to net short-term capital gains of the Fund.

Foreign shareholders will generally not be subject to U.S. tax on gains realized on the sale or redemption of shares of the Fund, except that a nonresident alien individual who is present in the United States for 183 days or more in a calendar year will be taxable on such gains and on capital gain dividends from the Fund.

However, if a foreign investor conducts a trade or business in the United States and the investment in the Fund is effectively connected with that trade or business, then the foreign investor’s income from the Fund will generally be subject to U.S. federal income tax at graduated rates in a manner similar to the income of a U.S. citizen or resident.

The Fund will also generally be required to withhold 30% tax on certain payments to foreign entities that do not provide a Form W-8BEN-E that evidences their compliance with, or exemption from, specified information reporting requirements under the Foreign Account Tax Compliance Act.

All foreign investors should consult their own tax advisers regarding the tax consequences in their country of residence of an investment in the Fund.

Shares of the Fund have not been registered for sale outside of the United States and certain United States territories.

State and Local Taxes. You may also be subject to state and local taxes on income and gain from Fund shares. State income taxes may not apply, however, to the portions of the Fund’s distributions, if any, that are attributable to interest on U.S. government securities. You should consult your tax adviser regarding the tax status of distributions in your state and locality.

Taxation of the Subsidiary. There is, at present, no direct taxation in the Cayman Islands and interest, dividends and gains payable to the Subsidiary will be received free of all Cayman Islands taxes. The Subsidiary is registered as an “exempted company” pursuant to the Companies Act (as amended). The Subsidiary has applied for, and expects to receive, an undertaking from the Governor in Cabinet of the Cayman Islands to the effect that, for a period of twenty years from the date of the undertaking, no law that thereafter is enacted in the Cayman Islands imposing any tax or duty to be levied on profits, income or on gains or appreciation, or any tax in the nature of estate duty or inheritance tax, will apply to any property comprised in or any income arising under the Subsidiary, or to the shareholders thereof, in respect of any such property or income.

More information about taxes is contained in the SAI.

DISTRIBUTION ARRANGEMENTS

The Board has adopted a Plan of Distribution for Class A Shares and Class C Shares of the Fund (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, the Fund’s Distributor is entitled to receive from the Fund a distribution fee with respect to the Shares, which is accrued daily and paid monthly, of up to 0.25%, of the Class A

Shares and up to 1.00%, of the Class C Shares, on an annualized basis of the average daily net assets of the Class A Shares and the Class C Shares of the Fund. The actual amount of such compensation under the Plan is agreed upon by the Company's Board and by the Distributor. Because these fees are paid out of the Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Amounts paid to the Distributor under the Plan may be used by the Distributor to cover expenses that are related to (i) the sale of the Shares, (ii) ongoing servicing and/or maintenance of the accounts of shareholders, and (iii) sub-transfer agency services, subaccounting services or administrative services related to the sale of the Shares, all as set forth in the Fund's 12b-1 Plan. Ongoing servicing and/or maintenance of the accounts of shareholders may include updating and mailing prospectuses and shareholder reports, responding to inquiries regarding shareholder accounts and acting as agent or intermediary between shareholders and the Fund or its service providers. The Distributor may delegate some or all of these functions to Service Organizations. See "Purchases Through Intermediaries" above.

The Plan obligates the Fund, during the period it is in effect, to accrue and pay to the Distributor on behalf of the Shares the fee agreed to under the Distribution Agreement. Payments under the Plan are not tied exclusively to expenses actually incurred by the Distributor, and the payments may exceed distribution expenses actually incurred.

ADDITIONAL INFORMATION

HOUSEHOLDING

In an effort to decrease costs, the Fund intends to reduce the number of duplicate prospectuses and other similar documents you receive by sending only one copy of each to those addresses shared by two or more accounts and to shareholders we reasonably believe are from the same family or household. Once implemented, if you would like to discontinue householding for your accounts, please call toll-free at 1-844-261-6488 to request individual copies of these documents. Once the Fund receives notice to stop householding, we will begin sending individual copies thirty days after receiving your request. This policy does not apply to account statements.

LOST SHAREHOLDER, INACTIVE ACCOUNTS AND UNCLAIMED PROPERTY

It is important that the Fund maintains a correct address for each shareholder. An incorrect address may cause a shareholder's account statements and other mailings to be returned to the Fund. Based upon statutory requirements for returned mail, the Fund will attempt to locate the shareholder or rightful owner of the account. If the Fund is unable to locate the shareholder, then it will determine whether the shareholder's account can legally be considered abandoned. Your mutual fund account may be transferred to the state government of your state of residence if no activity occurs within your account during the "inactivity period" specified in your state's abandoned property laws. The Fund is legally obligated to escheat (or transfer) abandoned property to the appropriate state's unclaimed property administrator in accordance with statutory requirements. The shareholder's last known address of record determines which state has jurisdiction. Please proactively contact the Transfer Agent at 1-844-261-6488 (toll free) at least annually to ensure your account remains in active status.

If you are a resident of the state of Texas, you may designate a representative to receive notifications that, due to inactivity, your mutual fund account assets may be delivered to the Texas Comptroller. Please contact the Transfer Agent if you wish to complete a Texas Designation of Representative form.

NO PERSON HAS BEEN AUTHORIZED TO GIVE ANY INFORMATION OR MAKE ANY REPRESENTATIONS NOT CONTAINED IN THIS PROSPECTUS OR IN THE FUND'S SAI INCORPORATED HEREIN BY REFERENCE, IN CONNECTION WITH THE OFFERING MADE BY THIS PROSPECTUS AND, IF GIVEN OR MADE, SUCH REPRESENTATIONS MUST NOT BE RELIED UPON AS HAVING BEEN AUTHORIZED BY THE COMPANY OR ITS DISTRIBUTOR. THIS PROSPECTUS DOES NOT CONSTITUTE AN OFFERING BY THE COMPANY OR BY THE DISTRIBUTOR IN ANY JURISDICTION IN WHICH SUCH OFFERING MAY NOT LAWFULLY BE MADE.

CONSOLIDATED FINANCIAL HIGHLIGHTS

The following consolidated financial highlights are intended to help you understand the Fund's financial performance since inception. The financial information presented for each applicable period prior to June 1, 2020 is that of the Predecessor Fund. The Fund is the accounting successor to the Predecessor Fund as a result of the reorganization of the Predecessor Fund into the Fund following the close of business on May 29, 2020. The Fund has adopted the financial statements of the Predecessor Fund. Certain information reflects financial results for a single Fund Share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund, assuming reinvestment of all dividends and distributions. The information for the fiscal year ended August 31, 2025, has been audited by PricewaterhouseCoopers LLP, the Fund's independent registered public accounting firm, whose report, along with the Fund's consolidated financial statements, is included in the Fund's [annual financial statements on Form N-CSR](#), which is available, without charge, upon request. The information for the years ended August 31, 2024, 2023, 2022 and 2021 was audited by the Fund's prior independent registered public accounting firm.
